Diclofenac

Diclofenac Dr. Müller Pharma 100 mg suppositories

Medicinal product

Diclofenac Dr. Müller Pharma suppositories contains active substance diclofenac sodium, which reduces symptoms of acute and chronic inflammation, reduces pain, swelling and fever.

Without a doctor's recommendation this medicinal product may be used to treat post-traumatic and post-operative pain, headache and menstrual pain, backache and toothache.

This medicinal product can be used only upon doctor's recommendation to treat pain and oedema in rheumatic disorders with joints localisation such as rheumatoid arthritis, osteoarthritis, ankylosing spondylitis (Bechterew's disease), various forms of non-articular rheumatism (e.g. inflammation of tendons, tendon vesicle or joint capsule, frozen shoulder, tennis elbow), for the treatment of acute attack of gout, migraine attacks and acute renal colic.

This medicinal product is indicated in adults and adolescents over 18 years of age and is intended for insertion into the rectum only.

Legal status and reimbursement by health insurance is dependent on National Health Agency.

Read the package leaflet before use.

Marketing Authorisation Holder: Dr. Müller Pharma s.r.o.

Packaging sizes: 10 and 12 suppositories

Diclofenac Dr. Müller Pharma 10 mg/g gel

Medicinal product

Diclofenac Dr. Müller Pharma gel contains active substance diclofenac sodium, which is intended to relieve pain and reduce inflammation and swelling in painful conditions affecting joints and muscles.

Without a doctor's recommendation this medicinal product may be used for local symptomatic relief of pain and inflammation in trauma of the tendons, ligaments, muscles and joints, e.g. due to sprains, strains and bruises.

This medicinal product can be used only upon doctor's recommendation for treatment of painful and rheumatoid conditions in mild to moderate knee and hand osteoarthritis.

This medicinal product is indicated in adults and adolescents over 14 years of age and is intended for external application only.

Legal status and reimbursement by health insurance is dependent on National Health Agency.

Read the package leaflet before use.

Marketing Authorisation Holder: Dr. Müller Pharma s.r.o.

Packaging sizes: 30 g, 50 g, 60g, 100 g, 120 g, 150 g, and 200 g.

Paracetamol/Caffeine

Paracetamol/Caffeine Dr. Müller Pharma 500 mg/65 mg tablets

Medicinal product

Paracetamol/Caffeine Dr. Müller Pharma contains the combination of two active substances – paracetamol and caffeine, which are effective against pain and fever. Paracetamol relieves pain and decreases increased body temperature. Caffeine potentiates analgesic effect of paracetamol, reduces fatigue, slightly supports breathing and blood circulation in febrile diseases.

Paracetamol/Caffeine Dr. Müller Pharma does not irritate the stomach.

Paracetamol/Caffeine Dr. Müller Pharma is suitable for the relief of headache, migraine, backache, toothache and period pain. Paracetamol/Caffeine Dr. Müller Pharma also relieves the unpleasant influenza and cold symptoms such as muscle or joint pain, sore throat and decreases fever.

After doctor recommendation, Paracetamol/Caffeine Dr. Müller Pharma can be taken to suppress pain in rheumatic diseases such as arthritis (degenerative joint disease) and neuralgia (pain located in nerve path).

Paracetamol/Caffeine Dr. Müller Pharma tablets can be taken by adults and adolescents over 12 years and are intended for oral use only.

Legal status and reimbursement by health insurance is dependent on National Health Agency.

Read the package leaflet before use.

Marketing Authorisation Holder: Dr. Müller Pharma s.r.o.

Packaging sizes on the market: 10, 12, 20, 24, and 30 tablets.

Sanomux®

Sanomux® 600 mg effervescent tablets

Medicinal product

Sanomux 600 mg contains active substance acetylcysteine, which dissolves all components that causes mucus viscosity and supports expectoration.

Sanomux is used to treat acute and chronic respiratory diseases, which are accompanied by intensive production of thick viscous mucus.

Without a doctor's recommendation Sanomux is suitable for acute respiratory diseases, such as influenza, tracheitis, bronchitis.

After doctor recommendation Sanomux is used in chronic respiratory diseases, such as inflammation of bronchi, trachea, bronchial asthma, bronchiolitis (inflammation of bronchiole), mucoviscidosis (cystic fibrosis - inherited disorder of mucus liquefaction). Moreover, acetylcysteine is used to treat inflammation of larynx, and with pre-operative or after-operative conditions associated with increased production of viscous mucus in airways.

Sanomux is suitable for adults and children over 14 years and is intended for oral use only.

Legal status and reimbursement by health insurance is dependent on National Health Agency.

Read the package leaflet before use.

Marketing Authorisation Holder: Dr. Müller Pharma s.r.o.

Packaging sizes on the market: 6, 10, 20, and 30 tablets.

Anginal® and Larinal®

Anginal® mouth sprays

Mouth sprays are medical devices for the care of the oral mucosa. They are intended to relieve symptoms associated with colds, infections of the mouth, throat or upper respiratory tract. They relieve hoarseness, irritated vocal cords and inflammatory processes in the throat and oral cavity. They moisten the oral cavity, improve swallowing, suppress bad breath and freshen breath. They help to soothe dry and irritated mucous membranes of the mouth and larynx caused by insufficient

saliva secretion. The lack of saliva and dry mouth can be caused by medications, various diseases and/or medical treatments such as radiation therapy or surgery. Lack of saliva in the mouth can also be caused by stress, depression, stay in a dry environment, as well as reduced fluid intake, especially in old age. Anginal® mouth sprays also help prevent tooth decay, bad breath and gingivitis. They are intended for daily preventive use.

Anginal® Mouth Spray with Sage

Medical device
The mouth spray relieves sore and itchy throat.

Anginal® Mouth Spray with Iceland Moss

Medical device
The mouth spray relieves hoarseness and irritated vocal cords.

Anginal® Mouth Spray with Tea Tree Oil

Medical device
The mouth spray relieves inflammatory processes in the throat and oral cavity.

Larinal® tablets

Tablets are food supplements containing extracts of important herbs. In traditional folk medicine, chamomile is used to soothe the mucous membranes of the oral cavity and throat. Mallow and Iceland moss contain mainly mucilaginous substances that promote better expectoration and protect the vocal cords during increased vocal strain or coughing. Sage acts as a supportive remedy for sore throats, colds and dental procedures. All tablets also contain vitamin C which contributes to the normal function of the immune system and reduces the level of fatigue and exhaustion. Larinal® tablets are sugar-free and are also suitable for diabetics.

Larinal® Tablets with Chamomile, Mallow and Sage

Food supplement
Chamomile, mallow and sage support the normal function of the respiratory and immune systems.
1 tablet contains 8 mg of mallow blossom extract, 8 mg of chamomile extract, 4 mg of sage leaf extract and 30 mg of vitamin C.

Larinal® Tablets with Iceland Moss

Food supplement
The extract of Iceland moss (Cetraria islandica) contributes to the proper function of the immune system and respiratory system.
1 tablet contains 30 mg of Iceland moss and 30 mg of vitamin C.

Larinal® Tablets with Sage and Liquorice

Food supplement
Sage and liquorice help natural breathing and contribute to the proper function of the human immune system.
1 tablet contains 4 mg of sage leaf extract, 4 mg of liquorice root extract and 30 mg of vitamin C.

Herbal Ointments and Gels

Herbal ointments and gels are traditional preparations with a high content of standardized extracts of various herbs used in folk medicine. Dr. Müller Pharma's herbal ointments and gels have specially developed formulas based on current scientific knowledge.

In the ointment, the extracts of herbs are dissolved mainly in a fatty base (vegetable oils, petroleum jelly, lanolin, lard and others), while the gel base is watery, i.e. non-greasy. The gel is more quickly absorbed, forms a thin film on the skin and dries very quickly, i.e. the active ingredients reach the skin faster, but their effect is shorter. The gel does not leave a greasy film on the skin and does not leave greasy stains on clothes. Thanks to the high water content, it has a cooling effect. The ointment is absorbed more slowly and gradually and, thanks to its oily base, has a softening but also moisturising effect as it reduces water loss from the skin through evaporation. The active ingredients are therefore absorbed more slowly but can reach deeper layers of the skin and their effect lasts longer. After application of the ointment, the surface of the skin remains oily and can also leave greasy stains on clothes. Ointments are mainly used on dry skin and irritated areas on the skin. The gel is more suitable for quick moisturizing of the skin and for massaging joints and muscles.

Dr. Müller Pharma's herbal ointments and gels spread well on the skin and the active ingredients are well absorbed into the skin.

Arnica Ointment Arnica Gel

Cosmetic product

Arnica ointment and gel contain an oil extract of arnica blossom (Arnica montana) obtained by a gentle process that guarantees a high content of active ingredients. The substances contained in arnica, especially the essential oils, have a very beneficial effect on the skin when the muscles feel tired, congested or strained.

Arnica ointment is suitable for softening and soothing skin irritated by any means (wind, frost, sun).

Arnica gel is an easily absorbed massage gel. It also contains essential oils – peppermint, lavender, rosemary and lemon oil. The gel is very suitable for muscle massage. Thanks to its formulation, it has a cooling effect and gives the skin a refreshing feeling.

Oak Bark Ointment Oak Bark Gel

Cosmetic product

Oak bark contains tannins that are disinfectant and astringent. In folk medicine, oak bark has always been used due to its astringent effect on the skin and mucous membranes (or surface blood vessels), for example, in haemorrhoids, superficial abrasions or light burns, frostbite or poorly healing wounds.

The proven ointment base in the ointment helps to soften and lubricate the skin at the application site.

The gel also contains clove oil and allantoin that soothe irritated skin.

Chamomile Ointment Chamomile Ointment TRADITIONAL

Cosmetic product

Both ointments contain gently distilled essential oil from chamomile blossom with standardized content of the active ingredients bisabolol and chamazulene that are known to have anti-inflammatory and disinfectant effects.

Ointments differ only in the ointment base. Chamomile ointment is based on a high content of glycerin, macadamia oil and beeswax. Glycerin is quickly absorbed into the skin and retains water. Thanks to this formulation, the skin is perfectly lubricated and softened but the ointment does not leave a greasy film for a long time. The traditional chamomile ointment has a water-free, very oily ointment base that lubricates the skin intensively and creates a long-lasting protective covering.

Both ointments support skin care for minor superficial injuries, damaged, irritated and cracked skin (e.g., from sun, frost, wind or even radiation).

Comfrey Ointment

Cosmetic product

Comfrey ointment is suitable for massaging tired muscles, joints and tendons, for the care of superficial or subsurface skin, tendon and muscle damage (bruises, etc.). Thanks to its high glycerin content and special formulation, the ointment reduces water loss from the skin, which increases its regenerative abilities.

When administered locally, the intense healing and anti-inflammatory effects of comfrey are particularly pronounced. Comfrey contains allantoin as the main active ingredient. In traditional medicine, comfrey is used to promote healing of superficial wounds and deeper bruises and to promote healing of bone fractures. Comfrey accelerates the healing of bruises and contusions, heals sprained joints and helps against eczema and varicose veins.

In sports medicine, comfrey is used in strained tendons and inflammation of muscle and tendon sheaths.

Calendula Ointment

Cosmetic product

Calendula ointment is suitable for the care of sensitive, dry, but also normal skin.

Traditionally, calendula ointment is suitable for massaging scars, for care for bruises, swellings, minor burns (even after sunbathing), scabs, in case of cracked or dry skin of legs, hands or lips. Calendula is used in traditional medicine for inflammation of veins, burns and frostbite, eczema and rashes. Calendula ointment is also very effective in caring for the skin of the abdomen and breasts during pregnancy and breastfeeding.

The ointment can also be used as a working protective ointment for hands and other parts of the body.

Sea Buckthorn Ointment

Sea buckthorn ointment Contains 100% virgin, cold-pressed sea Cosmetic product

buckthorn oil. Sea buckthorn contains a variety of biologically active substances that have beneficial effects on irritated skin (e.g., from frost, sun, wind or radiation).

Sea buckthorn oil has excellent regenerative but also epithelizing effects. In natural medicine, this oil is used to care for scars and for burns and frostbite.

Calcium Pantothenicum

Calcium pantothenicum is a traditional ointment intended to care for very dry and cracked skin of children and adults. The calcium salt of pantothenic acid which has a wide application in both cosmetics and dermatology is an active ingredient. The ointment significantly helps to soothe and restore damaged skin. Calcium pantothenicum ointment is suitable for regular care of irritated, red or inflamed skin under diapers in children and old people, as well as for lubrication of nipples of nursing mothers. It is also popular with cyclists. It can be used on a long-term basis.

■ **Calcium Pantothenicum Ointment**
Cosmetic product

Dermo-Chlorophyll®

Chlorophyll is a natural substance from the porphyrin group that is used in the energy and respiratory systems of living organisms, including humans. In medicine, chlorophyll is used primarily as a means promoting wound healing on the skin or mucous membranes and in oral hygiene. Due to its antibacterial effects, chlorophyll has a beneficial effect on the repair of damaged tissues and wound healing without inflammation. Dermo-Chlorophyll® products are intended for the treatment of dermatologically problematic skin. At the application site, chlorophyll creates conditions that are unfavourable for bacterial growth. Dermo-Chlorophyll® products can be used topically for tibial ulcers, poorly healing or festering wounds and minor burns of various origins.

■ **Dermo-Chlorophyll® Spray**
Cosmetic product
Dermo-chlorophyll spray is an oil-based preparation, containing an oil-soluble form of chlorophyll.
Due to the nature of the spray, it allows non-contact application to sensitive or difficult to reach areas. After spraying, it forms a fine, intensely green film. The oil base does not evaporate from the skin but is slowly absorbed, providing, in addition to the effects of chlorophyll, lubrication and creating a barrier which prevents dehydration of the skin, for example, after minor burns.

■ **Dermo-Chlorophyll® Gel**
Cosmetic product
Dermo-chlorophyll gel is an aqueous product which contains a water-soluble form of chlorophyll. It is quickly absorbed after application and can be reapplied after a short time.

DiabeCare®

Diabetes is one of the most common diseases in our population. In most diabetics, their disease is accompanied by skin problems. These are the result of hyperglycaemia or damage to the blood vessels in the microcirculation. Neuro-pathic complications of diabetes also contribute to the impaired skin sensitivity. The skin manifestations of a diabetic patient do not threaten life but can significantly reduce its quality. The skin of a diabetic patient is very dry, often itchy, and its nourishment is impaired. The skin on the feet, but sometimes also on other parts of the body, is the most commonly affected area. DiabeCare® products are specially formulated for the care of dry and sensitive diabetic skin. They contain natural substances that have the ability to penetrate the skin and retain water – ceramides, urea, glycerin, panthenol, macadamia oil, vitamin E and other substances. After application, both products are well absorbed and do not leave a greasy feeling.

■ **DiabeCare® Moisturizing Cream**
Cosmetic product
The cream is suitable for the skin care on smaller areas such as feet or hands immediately after washing.

■ **DiabeCare® Softening Body Milk**
Cosmetic product
The milk can be used on the whole body after bathing.

Dr. Müller Pastilles®

The popular Dr. Müller pastilles are medical devices intended to relieve symptoms accompanying colds, infections of the mouth, throat or upper respiratory tract. They vary according to the balanced combinations of herbal extracts they contain. Their taste properties are enhanced by honey and vitamin C. Vitamin C is a natural antioxidant, contributes to the normal function of the immune system and to the reduction of the level of fatigue and exhaustion. Dr. Müller pastilles are suitable for adults and most of them for children. They can be conveniently combined with Dr. Müller syrups.

Dr. Müller Pastilles® - medical devices:

Dr. Müller Pastilles® with Sage and Vitamin C

Medical device

Dr. Müller Pastilles® with Sage and Vitamin C, sugar-free

Medical device

The pastilles with sage relieve pain and scratching in the throat.
1 pastille contains 37.5 mg of sage leaf extract, 6 mg of vitamin C and 4.5 mg of sage essential oil.

Dr. Müller Pastilles® with Iceland Moss and Vitamin C

Medical device

Dr. Müller Pastilles® with Iceland Moss and Vitamin C, sugar-free

Medical device

The pastilles with Iceland moss relieve hoarseness and irritated vocal cords.
1 pastille contains 37.5 mg of Icelandic moss extract and 6 mg of vitamin C.

Dr. Müller Pastilles® with Cajeput Oil

Medical device

The pastilles relieve coughing.
1 pastille contains 25 mg of cajeput oil and 12.5 mg of peppermint essential oil.

Dr. Müller Pastilles® with Tea Tree Oil

Medical device

The pastilles relieve inflammatory processes in the throat and oral cavity.
1 pastille contains 25 mg of tea tree oil and 12.5 mg of peppermint essential oil.

Dr. Müller Pastilles® with Echinacea and Vitamin C

Medical device

The pastilles help prevent upper respiratory tract infections. 1 pastille contains 37.5 mg of purple coneflower extract and 6 mg of vitamin C.

Dr. Müller Pastilles® with Plantain, Wild Thyme and Vitamin C

Medical device

The pastilles relieve dry and irritating cough. 1 pastille contains 20 mg of plantain leaf extract, 20 mg of wild thyme herb extract and 6 mg of vitamin C.

Dr. Müller Pastilles® - food supplements:

Dr. Müller Pastilles® with Propolis, Aloe Vera and Vitamin C

Food supplement

The pastilles contain natural bee product propolis. They contain aloe vera to support natural immunity.

1 pastille contains 35 mg of propolis extract, 20 mg of vitamin C, 1.5 mg of lemongrass essential oil and 1.5 mg of aloe vera extract.

Dr. Müller Pastilles® with Propolis, Ginger and Vitamin C

Food supplement

In addition to the bees' natural product propolis, the pastilles contain ginger which contributes to normal digestion, natural immunity and normal respiratory function, and also helps maintain normal blood sugar levels in humans.

1 pastille contains 35 mg of propolis extract, 20 mg of vitamin C, 1.5 mg of lemongrass essential oil and 1 mg of ginger root extract.

Dr. Müller Pastilles® with Ginger and Vitamin C

Food supplement

Ginger helps the normal functioning of the respiratory and digestive systems, contributes to normal blood sugar levels and natural immunity.

1 pastille contains 12 mg of vitamin C and 2.5 mg of ginger root extract.

Dr. Müller Pastilles® with Ivy and Vitamin C

Food supplement

Ivy extract and clove oil contribute to the normal function of the respiratory system.

1 pastille contains 20 mg of ivy leaf extract, 6 mg of vitamin C and 0.5 mg of clove essential oil.

Dr. Müller Syrups®

The popular Müller syrups contain standardized extracts of various herbs and vitamin C. The use of the contained herbs is based on their effects known from traditional medicine. Plantain has been used since ancient times to relieve irritation of the upper respiratory tract, for catarrhs and coughs, and for inflammation of the mucous membranes of the mouth and throat. Iceland moss has traditionally been used for colds, bronchitis associated with coughs and fevers, indigestion and lack of appetite, irritation and inflammation of the oral cavity and pharynx. Wild thyme extract has a historically important position in folk medicine and traditional medicine as an effective cough remedy because it dissolves sputum well. The use of echinacea comes from the folk medicine of the North American Indians; they use it to reduce susceptibility to illness from colds.

Dr. Müller syrups are food supplements in liquid form. In addition to herbal extracts, all Dr. Müller syrups contain vitamin C which contributes to the body's natural defences and helps to reduce fatigue and exhaustion. Dr. Müller syrups are suitable for adults and children and are very tasty.

Dr. Müller Syrup® with Plantain and Vitamin C

Food supplement
1 teaspoon (5 ml) of syrup contains plantain extract equivalent to 136.5 mg of dried plantain leaf and 19.5 mg of vitamin C.

Dr. Müller Syrup® with Plantain, Honey and Vitamin C

Food supplement
1 teaspoon (5 ml) of syrup contains plantain extract equivalent to 175.5 mg of dried plantain leaf, 650 mg of honey and 19.5 mg of vitamin C.

Dr. Müller Syrup® with Plantain and Vitamin C, sugar-free

Food supplement
1 teaspoon (5 ml) of syrup contains plantain extract equivalent to 179.4 mg of dried plantain leaf and 19.5 mg of vitamin C. Plantain in these syrups supports the normal function of the respiratory system and, like vitamin C, contributes to the support of the immune system.

Dr. Müller Syrup® with Iceland Moss and Vitamin C

Food supplement
Iceland moss supports the normal function of the respiratory system and contributes to the normal function of the immune system.
1 teaspoon (5 ml) of syrup contains Iceland moss extract equivalent to 210.4 mg of dried Iceland moss and 19.5 mg of vitamin C.

Dr. Müller Syrup® with Echinacea and Vitamin C

Food supplement
Purple coneflower (Echinacea purpurea) contributes to the natural immunity and normal function of the immune system. 1 teaspoon (5 ml) of syrup contains purple coneflower extract equivalent to 182 mg of dried purple coneflower herb and 19.5 mg of vitamin C.

Dr. Müller Syrup® with Wild Thyme and Vitamin C

Food supplement
The syrup contains wild thyme extract which supports the normal function of the respiratory system and contributes to the overall well-being of breathing. It supports natural digestion.
1 teaspoon (5 ml) of syrup contains wild thyme extract equivalent to 179.4 mg of dried wild thyme herb and 19.5 mg of vitamin C.

Dr. Müller Syrup for Children® with Plantain, Wild Thyme and Vitamin C

Food supplement
1 teaspoon (5 ml) of syrup contains wild thyme extract corresponding to 104 mg of dried wild thyme herb, plantain extract corresponding to 52.65 mg of dried plantain leaf and 19.5 mg of vitamin C.

Ferrofruit®

Iron (Fe) is a component of hemoglobin in red blood cells and myoglobin in muscles and is indispensable for the formation of some important enzymes and hormones in the body. It is an essential element for humans that must be taken in through food. The recommended dose is 14 mg/day. Blood donors and menstruating women, pregnant women, vegetarians and the elderly should take up to 2 times more. Iron deficiency can manifest itself in fatigue, immune system disorders and limited physical activity.

Ferrofruit® contains organically bound iron which is very well absorbed by the body. The product has excellent taste properties. The iron in Ferrofruit® contributes to the normal production of red blood cells and hemoglobin, helps to reduce the level of fatigue and exhaustion and normalize the function of the immune system. Ferrofruit® is intended for iron supplementation during increased fatigue and recovery. It is suitable for blood donors, for women during menstruation, for children during growth, for adolescents and for the elderly.

Ferrofruit®

Food supplement

1 teaspoon (5 ml) of syrup contains 7 mg of iron.

Flatol®

Flatulence is caused by the accumulation of gas in the intestine in the form of small or large bubbles. The gas bubbles cause uncomfortable distension of the intestine in some places, which is felt as painful bloating. The gases then often escape in larger volumes.

Flatol® contains simethicone and fennel essential oil which helps with bloating and abdominal cramps and supports digestion and elimination.

Flatol®

Food supplement

1 capsule contains 80 mg of simethicone and 25 mg of fennel essential oil.

Glycerin Suppositories

Glycerin contained in the suppository promotes bowel emptying, softens and moistens the stool, increases and liquefies its volume in the rectal area and facilitates its excretion.

Glycerin suppositories are medical devices intended to promote very gentle emptying of intestinal contents when the stool is thickened and hard. The suppositories have primarily a local physical effect – the increase in osmotic pressure due to the high concentration of glycerin causes water to enter the rectum. This causes the contents to enlarge and liquefy and facili-

tate elimination. When passing stool, glycerin also has a lubricating effect: the surface of the rectum becomes slippery and the stool is excreted more easily. A slight irritation of the mucous membrane of the rectum, caused by the constituents of the suppository, also contributes to the effect. The effect occurs within 15-30 minutes of application of the suppository into the rectum. Glycerin suppositories 2.2 g are also suitable for pregnant and breastfeeding women. Children's suppositories are suitable for children from the age of 1 year.

Hyalosan

Hyalosan medical products contain biologically active hyaluronic acid; some also contain lactic acid and many other beneficial substances. Hyaluronic acid is an important natural component of many tissues of the human body, including skin and mucous membranes. In the vaginal environment, it forms a protective gel that immediately protects and moisturizes the mucous membrane. Hyalosan medical devices use low molecular weight hyaluronic acid which is absorbed deeper into the vaginal mucosa, supporting the natural moisturizing mechanisms of the mucosa and accelerating the natural process of its regeneration. It also prevents thinning of the vaginal mucosa and promotes its recovery during natural or chemotherapy- or surgery-induced menopause. Under physiological conditions, lactic acid is produced by bacteria that colonize the vaginal mucosa. It provides an acidic environment of the vagina, which in turn promotes the growth of the natural bacterial microflora and, at the same time, creates unfavourable conditions for the occurrence of undesirable microorganisms. Hyalosan vaginal suppositories, vaginal gel and lubricating gel are medical devices that maintain the naturally moist environment of the vaginal mucosa. They are used to support the regeneration and restoration of its natural state in problems caused by vaginal dryness associated with hormonal changes in all phases of a woman's life, especially during menopause, after childbirth, during breastfeeding, after chemotherapy and radiotherapy, or gynaecological surgery. They are also suitable for problems associated with atrophy of the vaginal mucosa and epithelium, manifested by itching, burning, redness or discomfort during sexual intercourse. They are intended for vaginal use only. The preparations are suitable for long-term use.

Hyalosan Vaginal Suppositories and Hyalosan Vaginal Gel

Medical devices
They are intended primarily for the prevention and support of therapy of vaginal dryness and atrophy of the vaginal mucosa from all causes.

Hyalosan Lubricating Gel

Medical device
It is intended to make intimate experiences more pleasant and enriching for women who suffer from vaginal dryness for the reasons mentioned above. It eliminates unpleasant painful sensations when the vaginal mucosa is insufficiently moisturized and, at the same time, promotes the regeneration and restoration of the natural state of the vaginal mucosa. It can be used together with a condom. The lubricating gel is also suitable for easier insertion of a thermometer or menstrual tampons into the vagina. Hyalosan vaginal gel can also be used for the same purpose. Hyalosan lubricating gel is water-based and contains no perfumes, oils or dyes. It does not stain. It is not absorbed into the body. It is not a substitute for contraception.

The Hyalosan range is complemented by **cosmetic products** intended for regular female intimate hygiene.

Hyalosan Intimate Wash Gel

Hyalosan Feminine Intimate Wash Foam

These are cosmetic products with hyaluronic acid and gentle active detergents for the daily care of women's intimate parts. They also contain lactic acid which maintains the natural pH of the intimate areas. Hyalosan feminine intimate wash foam also contains oak bark extract which has an astringent effect on the skin, accelerating its natural regeneration (suitable also for women in puerperium). These products do not dry out the skin but rather soothe it with hyaluronic acid, leaving it perfectly clean, soft and naturally hydrated. They are essential helpers for every woman's intimate comfort.

Horse Balms

Horse balms contain a balanced combination of standardized herbal extracts and essential oils that promote blood circulation. They are suitable for massages of tired and strained muscles, tendons and joints.

Horse Balm Warming

Cosmetic product
Warming horse balm contains a combination of herbal extracts (horse chestnut, sweet clover, calendula, witch hazel, mountain arnica, and chamomile), essential oils (fir, pine, eucalyptus, mint, lavender and thyme essential oils) and other substances with a warming and blood circulation promoting effect. The balm contains hot pepper extract for faster warming of and blood supply to the massaged area of tired muscles and limbs.

Horse Balm Cooling

Cosmetic product
Cooling horse balm contains extracts of horse chestnut, sweet clover, calendula, witch hazel, mountain arnica, and chamomile, as well as essential oils: fir, pine, eucalyptus, mint, lavender and thyme essential oils and other substances with a cooling effect (menthol). It is suitable for massages of tired muscles and limbs. It has an excellent cooling effect on bruised muscles.

IchthyoCare

White ichthammol is the active ingredient in IchthyoCare products. It is a light form of sulphonated shale oil which, unlike dark ichthammol, contains no substances that could contribute to skin irritation. Its advantages include better water solubility, higher purity and therefore lighter colour and better skin tolerance. It is also more active against yeasts and fungi that are the cause of many skin diseases and one of the causative agents of scalp dandruff.

IchthyoCare Anti-Dandruff Shampoo

Cosmetic product
IchthyoCare anti-dandruff shampoo has a positive effect on the scalp which is very oily, itchy and forms excessive amounts of dandruff. The shampoo is also suitable as a supportive scalp care product for psoriasis.

IchthyoCare Soap

Cosmetic product
IchthyoCare soap contains 2.5% of white ichthammol and is recommended for cleaning itchy skin in various dermatological conditions.

IchthyoCare Ointment IchthyoCare Paste

Cosmetic product
IchthyoCare ointment and paste are suitable as aftercare products for problem skin, especially for itchy skin and redness after sun exposure. They are recommended where the skin needs to be well lubricated. The ointment contains 4% of white ichthammol while the paste 5%. The paste also contains zinc oxide which is good for itching. Both products are very well tolerated and do not require preservation.

Klimakterin®

Climacteric, or menopause, is a period in a woman's life during which the function of the reproductive organs declines and the production of female sex hormones (estrogens and gestagens) drops significantly. Low estrogen levels are manifested by mood swings, restlessness, nervousness, insomnia, depression, anxiety, fatigue, headache or flushes and sweating. Gestagens (progesterone) help maintain mental well-being. Klimakterin® products contain a combination of herbs that help manage the symptoms associated with menopause. They contain extracts of clover blossom, sage leaf, lemon balm herb, calendula blossom, and lavender blossom. These herbs have a positive effect on the hormonal balance of women.

Klimakterin® Tea

Food supplement
Klimakterin® tea contains dried herbs in sachets. Clover and sage help women manage the symptoms associated with menopause (flushes, sweating, restlessness) and contribute to the natural comfort during menopause. Lemon balm helps maintain a positive mood, contributes to optimal relaxation and rest, and helps maintain natural hormonal balance. Calendula promotes refreshment and cleansing of the body and contributes to optimal relaxation. Lavender promotes restful sleep and contributes to mental well-being and natural comfort during menopause.
1 sachet contains 795 mg of clover, 345 mg of lemon balm, 225 mg of calendula and 135 mg of lavender.

Klimakterin® Capsules

Food supplement
Klimakterin® capsules contain isoflavones from red clover and soya to maintain women's natural hormonal balance. Klimakterin® capsules also contain vitamin D which contributes to the normal absorption of calcium and phosphorus and the maintenance of normal bones and teeth, and fish oil which is a source of omega-3 unsaturated fatty acids.
1 capsule contains 75 mg of red clover extract, 25 mg of soya extract, 2 µg of vitamin D and 300 mg of fish oil.

Lubricating and Intimate Massage Gels Ty&Já®

Lubricants are slowly flowing to semi-solid gels with a high water content (except the silicone gel), intended for application to the genitals before and during sexual intercourse. Sexual intercourse without sufficient moistening or lubrication can be uncomfortable or even painful. Reduced moisturising can be caused by lack of arousal, hormonal changes during and after menopause that cause thinning and drying of the vaginal epithelium, hormonal changes during breastfeeding and the effects of certain medications. The use of lubricating gel makes intercourse more pleasurable.
Modern aqueous lubricating gels contain hydroxyethyl cellulose as a sliding agent. It is modified natural cellulose which has no side effects and does not damage condoms. The use of the gel increases the slipperiness and thus reduces the occurrence of microtraumas (small abrasions) that usually occur during sexual intercourse.

Ty&Já® Lubricating Gels

Medical devices
They are intended to preserve the natural moisture of the vaginal mucosa and to make intimate experiences more pleasant and enriching. They eliminate unpleasant painful sensations when the mucous membrane is not sufficiently moistened. It can be used together with a condom.
The lubricating gel is also suitable for easier insertion of a thermometer, menstrual tampons or other devices or instruments into the vagina and for measuring the rectal temperature. They are not absorbed into the body. They are not a substitute for contraception.

Ty&Já® Lubricating Gel Non-Perfumed

Medical device
It is water-based and free of oils, perfumes and dyes. It has a neutral taste. It does not stain.

Ty&Já® Lubricating Gel Perfumed with Peach Aroma

Medical device

Ty&Já® Lubricating Gel Perfumed with Strawberry Aroma

Medical device
Both of these gels are water-based. They do not contain oils or dyes.

Ty&Já® Silicone Lubricating Gel

It is a silicone-based medical device.

This group of gels is complemented by the **cosmetic product:**

Ty&Já® Intimate Massage Gel with Australian Tea Tree Oil

The product is suitable for gentle massage of intimate parts to make intimate experiences more pleasant and enriching and to eliminate unpleasant sensations in case of insufficient moisturizing. It is water-based, dye-free and non-staining. This gel is intended for external genitalia or other parts of the body for massage.

Lesněnky®

Lesněnky® are candies intended to dissolve in the mouth for fresh breath and regular oral hygiene. They contain vitamin C and menthol and have a pleasant taste. Lesněnky® are sugar-free, refresh the breath and leave a delicious taste in the mouth.

Lesněnky® Mint Drops

1 drop contains 3 mg of peppermint essential oil.

Lesněnky® Fir-Needle Drops

1 drop contains 10 mg of pine extract, 10 mg of spruce extract and 4 mg of pine essential oil.

Lesněnky® Eucalyptus Drops

1 drop contains 17 mg of eucalyptus essential oil.

Protective Hand Creams

The skin has protective mechanisms but if they are damaged for a long time (e.g., by frequent washing), their function is reduced. Damage can be manifested as redness, drying, cracking or itching. Hands should be washed carefully with gentle detergents. Equally important is the treatment of the hands with special creams after washing. The Primalona® range consists of protective cosmetic products for work in all branches of industry and services. Primalona® protective hand creams contain mineral oil and other lipophilic substances that form a layer on the skin which limits water loss from the skin. Moisturizing agents – glycerin and Aloe vera that replenish lost moisture to the skin are an important component. The skin is also protected by vitamin E. The contained panthenol is essential for nourishing and moisturising the skin. The protective creams also include soothing components such as calendula or chamomile extracts that reduce redness and irritation of the skin.

Panthenol – Food Supplements

In preparations for internal use, the properties of panthenol are used to regenerate the mucous membranes in the throat and mouth during and after respiratory infections, aphthae or minor injuries, and the moisturizing effect of panthenol on the mucous membranes is also used, i.e. moistening and protecting the mucous membranes and supporting their natural nutrition. Panthenol in food supplements supplies the whole body with vitamin B5. Pantothenic acid and panthenol that are converted into each other in the body help to reduce the level of fatigue and exhaustion and also contribute to the normal energy metabolism of humans. At the same time, their positive effect on the skin, hair and nails is exploited.

■ Panthenol Tablets, 40 mg

Food supplement
1 tablet contains 40 mg of dexpanthenol.

■ Panthenol Tablets, 100 mg

Food supplement
1 tablet contains 100 mg of dexpanthenol.

■ Panthenol Capsules, 40 mg

Food supplement
1 capsule contains 40 mg of dexpanthenol.

■ Panthenol PLUS Capsules, 40 mg

Food supplement
In addition to pantothenic acid, this product also contains vitamin B12, horsetail extract, biotin and the minerals zinc and selenium. All these substances contribute to the maintenance of normal bones, skin, hair and nails. Vitamin B12 and Vitamin D3 contribute to the normal function of the immune system. 1 capsule contains 43 mg of pantothenic acid, 50 mg of horsetail extract, 10 mg of zinc, 150 µg of D-biotin, 10 µg of selenium, 5 µg of vitamin D3, and 2 µg of vitamin B12.

PantheHair®

The range of hair care products is based on the most advanced active ingredients intended to protect, nourish and improve the appearance of hair, and gentle washing surfactants used in hair cosmetics. Panthenol is the most important active ingredient in PantheHair® shampoos. In the shampoos, it is contained in a biologically active concentration of 3%. The conditioner contains 4% of panthenol. Panthenol (provitamin B5) is important for hair nourishment and has a positive effect on the quality, shine, feel and flexibility of the hair.

■ PantheHair® Shampoo for Normal Hair

Cosmetic product
The shampoo is intended for everyday hair care.

■ PantheHair® Shampoo for Greasy Hair

Cosmetic product
The shampoo is recommended for excessively greasy hair and for care of itchy scalp.

■ PantheHair® Shampoo for Damaged Hair

Cosmetic product
The shampoo is suitable for the care of hair during frequent waving and blow-drying, for the care of split ends and also for the care of hair after perms and colouring.

■ PantheHair® Caffeine Shampoo

Cosmetic product
The shampoo promotes hair growth, contains

gentle active washing agents for daily care of hair and sensitive scalp. It leaves hair vital and naturally beautiful. It cares of itchy scalp and has a gentle cooling effect.

■ PantheHair® Anti-Dandruff Shampoo

Cosmetic product
In addition to 3% panthenol, the shampoo also contains effective concentrations of two active ingredients – climbazole and octopirox that act by different mechanisms against the causative agent of dandruff. The shampoo is therefore suitable for hair care in case of increased dandruff formation and excessive hair greasing. It also takes excellent care of itching scalp.

■ PantheHair® Conditioner

Cosmetic product
The conditioner is intended for easy combing of hair. It contains 4% of panthenol and substances with antistatic effects. Regular use results in soft, shiny and easy to comb hair.

Panthenol

Panthenol and pantothenic acid belong to the group of vitamins B5. In the body they are converted into one another. Panthenol is better absorbed into the deeper layers of the skin than pantothenic acid and is therefore more suitable for dermatological and cosmetic use.

In cosmetics, panthenol is used for its moisturizing and soothing effect. It helps the skin to form a protective layer against damage, and its beneficial effect on skin burns is significant. It has excellent regenerative and moisturising properties. Panthenol is essential for maintaining healthy skin. The effects of panthenol are mainly used in the application of after-sun products.

Panthenol Foam 6 %

Cosmetic product
The foam brings relief, soothes and pleasantly cools skin overexposed to the sun or otherwise irritated. The foam absorbs easily and is easy to apply even on areas where rubbing is painful.

Panthenol Cream 7 %

Cosmetic product
The cream is suitable for daily care of skin that is exposed to stress or strain from the weather – sun, rain, wind or frost.

Panthenol Gel 7 %

Cosmetic product
The gel is easily absorbed and spreadable. It is great for after-sun skin. It brings relief, soothes and pleasantly cools overexposed skin.

Panthenol Body Lotion 7 %

Cosmetic product
The body lotion is a fresh, light emulsion, suitable for regular care of the skin all over the body. It is especially suitable for application after sunbathing, bathing, sauna or on skin stressed by cold, heat, frost or dryness. It is also suitable for very sensitive skin.

Panthenol Lip Cream 7 %

Cosmetic product
The lip cream brings immediate relief to dry and stressed lips that it perfectly lubricates and softens. It is suitable for use in excessive sunlight or frost.

Panthenol Lip Stick

Cosmetic product
The lip stick is intended for regular care of dry lips.

Panthenol Shampoos

Panthenol shampoos take advantage of the beneficial effect of vitamin B5 (panthenol, pantothenic acid) on the skin and hair. The shampoos contain 2% and the conditioner 4% of panthenol and are intended for regular hair care to keep hair beautiful, shiny and flexible.

Panthenol Shampoo for Normal Hair 2%

Cosmetic product
The shampoo is intended for everyday hair care.

Panthenol Shampoo for Damaged Hair 2%

Cosmetic product
The shampoo is intended for hair that is frequently blow-dried, coloured and permed.

Panthenol Shampoo for Greasy Hair 2%

Cosmetic product
The shampoo is intended for hair that is greasy to an increased extent and to care of itching scalp.

Panthenol Anti-Dandruff Shampoo 2%

Cosmetic product
The shampoo is suitable for hair with increased dandruff formation and increased hair greasing.

Panthenol Conditioner 4%

Cosmetic product
The conditioner is intended for after-care after washing hair to make it easy to comb, soft and shiny.

Panthenol HA

Panthenol is essential for maintaining healthy skin, beautiful nails and hair. Its effects are used in cosmetics and dermatology. The products of the HA range not only take advantage of the regenerating and moisturising effects of panthenol on the skin, but in addition to it, hyaluronic acid (HA) contained in the product also has excellent regenerating and moisturising effects on the skin. It ensures its elasticity and smooth appearance. Panthenol and hyaluronic acid have a high water-binding capacity, contribute to maintaining skin elasticity and accelerate skin regeneration after sun exposure. Panthenol HA products also contain vitamin E which protects the skin from the effects of excessive UV radiation.

Panthenol HA Body Milk 7%

Cosmetic product
The body milk relieves and soothes skin overexposed to sun, lubricates, moisturizes and regenerates skin dried by sun, bathing or frost. The milk is also suitable for particularly sensitive skin all over the body.

Panthenol HA Gel 7%

Cosmetic product
The gel relieves and soothes skin overexposed to sun. It has a strong cooling effect and spreads quickly and easily. Thanks to the formula, the active ingredients are quickly absorbed after application. Vitamin E in microcapsules has a beneficial effect on the skin after sun exposure.

Panthenol HA Cream 7%

Cosmetic product
The cream is suitable for daily care of dry and sensitive skin.

PantheNose®

PantheNose® nasal sprays are medical devices that gently clean the nasal cavity, remove dry crusts, reduce mucus production during a runny nose and make breathing easier. They moisturize the nasal mucosa and protect it from drying out. Panthenol contained has regenerating and moisturising effects.

The PantheNose® range is complemented by cosmetic products – PantheNose® ointments with essential oils and bisabolol that are intended to care of the skin around the nose during a runny nose. Both ointments also contain chamomile oil, calendula blossom oil extract and vitamin E with soothing effects on the skin around the nostrils.

PantheNose® Nasal Spray with Aloe Vera

Medical device
In addition to panthenol, the spray also contains aloe vera and glycerin that soothe and heal the nasal mucosa during a runny nose and promote moisturizing.

PantheNose® Nasal Spray with Magnesium

Medical device
In addition to panthenol, the spray also contains magnesium which contributes to the reduction of allergic reactivity of the nasal mucosa, i.e. has a beneficial effect on allergic rhinitis.

PantheNose® Nasal Ointment with Essential Oils

Cosmetic product

PantheNose® Nasal Ointment with Bisabolol

Cosmetic product

PediCare®

PediCare® products contain substances that soften and lubricate the skin, leaving it soft and supple. They care of cracked heels and the skin of feet, knees and elbows. They remove crusts of cracked skin. They protect the skin from drying out and subsequent hardening and peeling. Antimicrobial ingredients counteract undesirable microorganisms whose overgrowth and activity leads to sweat decomposition and unpleasant odour. PediCare® products reduce foot odour as a result. The high panthenol content promotes nutrition, regeneration and healthy skin development.

PediCare® Balm for Hard Skin

Cosmetic product
The balm contains cosmetic, easily absorbed oils that help soften the top layer of the skin and promote the restoration of the skin's natural protective barrier which prevents drying and subsequent cracking of the skin.

PediCare® Cream for Fissured Heels

Cosmetic product
The cream contains glycolic acid which has the ability to gently soften and remove hardened skin.

Chest Rub Balms

Cosmetic products
The chest rub balms are suitable for massaging the chest, neck, temples, forehead and nape of the neck. They contain essential oils of pine, fennel, thyme and clove that, which are plant products. They are volatile, water-insoluble substances or mixtures of substances and have a very penetrating scent. The plant essential oils contained, combined with menthol and camphor, improve blood circulation to the skin at the points of application, make breathing easier in colds and keep the airways clear.

Chest Rub Balm

Chest Rub Balm for Kids

is a gentle product intended for children from 1 year of age. Plant essential oils are incorporated into an ointment base of shea butter, beeswax and almond oil.

Products for Children

Dr. Müller tea and syrup for children contain extracts of plantain and wild thyme that have been used in traditional medicine since ancient times to relieve upper respiratory tract problems, coughs, inflammations of the oral mucosa and throat. Vitamin C contributes to natural immunity and helps to reduce the level of fatigue and exhaustion. The tea and sirup are suitable for children from 1 year of age.

Dr. Müller Tea for Children with Plantain and Wild Thyme

Food supplement
1 sachet contains 675 mg of wild thyme, 450 mg of marshmallow, 150 mg of thyme, 75 mg of plantain, 75 mg of Iceland moss and 75 mg of liquorice.

Dr. Müller Syrup for Children with Plantain, Wild Thyme and Vitamin C

Food supplement
1 teaspoon (5 ml) of syrup contains wild thyme extract corresponding to 104 mg of dried wild thyme herb, plantain extract corresponding to 52.65 mg of dried plantain leaf and 19.5 mg of vitamin C.

Kids Belly Balm

Cosmetic product
Fine massage balm with content of natural essential oils. It is suitable for care in case of problems with flatulence. Regular gentle and sensitive massage soothes your baby, warms up the tummy and thus helps to release the tension.

Chest Rub for Children

Cosmetic product
Gentle product for care of children's soft and other sensitive skin with ointment base of shea butter, beeswax and almond oil. Contained essential oils (pine, fennel, thyme and clove) have a gentle warming effect on the skin.

Dr. Müller Bears

Dr. Müller Bears are food supplements – teddy bear-shaped tablets of different flavors with vitamin C. Vitamin C contributes to the normal function of the immune system, to the reduction of the level of fatigue and exhaustion and to normal mental well-being. One tablet contains 200 mg of vitamin C. The tablets are suitable for children from 3 years of age.

Tiger Balm

Cosmetic product
High in essential oils, especially clove essential oil, tiger balm is used for its cooling effect on the skin to relieve tension caused by fatigue. It is intended for external application for massaging the temples, neck or nose area. Thanks to its oily ointment base, it also thoroughly softens the skin.

Tea Tree Oil Products

Tea tree oil (TTO) is an essential oil native to wild-growing trees (*Melaleuca alternifolia*). These are low-growing trees from the east coast of Australia and the oil has been used by Australian Aborigines to treat a range of ailments for thousands of years. Today, tea tree oil comes from plants grown on plantations. The oil has to be obtained by a special gentle distillation method that guarantees its high potency and slight characteristic aroma. Its excellent antibacterial, antifungal and anti-inflammatory properties are used in medicine and cosmetics. TTO acts against a wide range of bacteria and contributes to increasing the body's immunity. Its quality is very important as not all oils have a high content of active substances (especially 4-terpineol). Dr. Müller Pharma uses the highest quality pharmaceutical grade Tea Tree Oil in its products. Tea tree oil is used in products to improve the appearance of the skin, reduce redness due to inflammatory reaction, reduce skin irritation, reduce itching and soothe the skin.

- **Tea Tree Oil - 100% Pure Oil**
Tea Tree Oil - 100% Pure Tea Tree Oil - Roll-On
Pure TTO is a very effective natural antiseptic with an excellent antimicrobial effect. This pure oil also has an intense repellent effect. It has a beneficial effect on acne, aphthae, warts, cold sores, itching from insect bites, and it also repels ticks.
- **Tea Tree Oil Cream**
In addition to TTO, it contains other active ingredients such as macadamia, jojoba and avocado oils and vitamin E to care for the skin and keep it supple.
- **Tea Tree Oil Facial Lotion**
Tea Tree Oil Facial Cleansing Gel
The lotion cleanses, pleasantly refreshes and soothes the skin and effectively removes impurities from the skin.
- **Tea Tree Oil Foot Massage Cream**
It has a deodorizing effect, prevents sweating of the feet and effectively removes their odour. It softens hardened skin on the feet.

- **Tea Tree Oil Lip Balm**
The lip balm brings instant relief to stressed and dry lips.
- **Tea Tree Oil Anti-Dandruff Shampoo**
The shampoo with tea tree oil is intended to reduce the formation of dandruff gently and effectively.
- **Tea Tree Oil Natural Glycerin Soap**
The pure natural unscented soap contains 1.5% of oil and 0.5% of tea tree leaves. Tea tree oil gives this mild soap a long-lasting deodorising effect and the leaves act as a natural peeling.

- **Tea Tree Oil Intimate Wash Foam**
- **Tea Tree Oil Intimate Wash Gel**
The gentle foam and gel with tea tree oil are suitable for everyday hygiene of intimate parts of the body. Lactic acid helps to maintain the natural pH of the intimate parts.
- **Tea Tree Oil Gel for Women's Intimate Hygiene**
Tea tree oil gel for intimate hygiene is intended for care of the external genitalia of women suffering with problems manifested by itching, burning or dryness in the intimate parts. The gel can also be used as a lubricant and is recommended for use before and after visiting swimming pools and bathing areas.
- **Tea Tree Oil Intimate Massage Gel**

Urosept®

The Urosept product line contains the extract of the cranberry fruit ("Canadian cranberry", Latin *Vaccinium macrocarpon*) as the main active ingredient. The use of Canadian cranberries is based on traditional medicine. The ripe fruit was used by Native Americans for urinary tract diseases. Until the discovery of antibiotics, cranberries were also a popular remedy for the prevention and treatment of urinary tract infections in Europe. The content of the main active substances - proanthocyanidins (PACs) - is important. Urosept forte and other products from this product line contain other extracts from herbs that are also used in traditional medicine to support the urinary tract: extract of bearberry leaf, white birch leaf, horsetail herb, and nettle leaf. The popular herbal tea Urosept with Canadian cranberry juice contains also goldenrod, hibiscus, rosehip, rosemary and bucco leaf that support excretion through the urinary tract. To support normal urinary tract function, it is recommended to limit sugar intake and increase fluid intake.

Urosept® Capsules

Food supplement
1 capsule contains 300 mg of dried juice from the cranberry fruit.

Urosept® FORTE Capsules

Food supplement
1 capsule contains 300 mg of dried juice of the cranberry fruit, 25 mg of bearberry leaf extract and 10 mg of horsetail extract.

Urosept® Syrup

Food supplement
1 teaspoon (5 ml) contains 731.5 mg of the dry cranberry juice concentrate.

Urosept® FORTE Syrup, sugar-free

Food supplement
1 teaspoon (5 ml) contains 727 mg of dry cranberry juice concentrate (50 mg of proanthocyanidins), 33.05 mg of rosehip fruit extract DER 10:1, 9.915 mg of bearberry leaf extract DER 10:1.

Urosept® Pastilles, sugar-free

Food supplement
1 pastille contains 25 mg of the cranberry fruit extract, 25 mg of the extract of the white birch, 13 mg of vitamin C and 10 mg of the bearberry leaf extract.

Urosept® Tablets, sugar-free

Food supplement
1 tablet contains 333 mg of dried cranberry fruit juice.

Urosept® MANOSA Tablets

Food supplement
1 tablet contains 750 mg of D-mannose, 250 mg of cranberry fruit extract and 10 mg of bearberry leaf extract.

Urosept® Herbal Tea

Food supplement
1 sachet contains 800 mg of goldenrod herb, 300 mg of hibiscus blossom, 300 mg of rosehip fruit, 200 mg of cranberry fruit, 200 mg of lady's bedstraw herb, 100 mg of rosemary leaf and 100 mg of bucco leaf.

Varikosan®

Varikosan contains a mixture of extracts from plants known in traditional medicine to be suitable for protecting blood vessels after application to the skin: horse chestnut seeds, sweet clover, witch hazel, and calendula. Varikosan massage gel also includes panthenol which has moisturizing and regenerating effects. This gel refreshes tired legs and is suitable for massaging the legs when they feel heavy, after strenuous work and sports activities.

Varikosan® Massage Gel

Cosmetic product

Vitamin E

Vitamin E, alpha-tocopherol, is a fat-soluble vitamin. It occurs naturally mainly in vegetable oils and cereal germs. In dermatology, vitamin E when applied to the skin promotes its hydration, suppleness and softness. All of these effects are related mainly to its antioxidant activity – the ability to remove free radicals that are produced as a result of exposure to various types of radiation and chemical or other undesirable environmental influences. When used externally, vitamin E protects skin cells from damage, slows down the aging process and contributes to the skin elasticity, softness and youthful appearance. Dr. Müller Pharma's vitamin E products (cream and body milk) are suitable for regular daily skin care. Vitamin E ointment is intended to lubricate very dry to cracked skin.

Cosmetic products

Všiven®

Lice are parasites that live in human hair where they suck blood. Lice are found only on the head and cause a disease called pediculosis. It is spread mainly by direct contact in collectives or in the family and also through various objects (combs, hairbrushes, headwear, and/or bedding). Personal hygiene, especially frequent head washing, is a general prerequisite for the prevention of this disease. If lice are present, it is necessary to use a lice treatment immediately and in the whole collective. However, lice are becoming increasingly resistant to many preparations. Všiven® hair balm and shampoo contain plant essential oils and fruit extracts that protect against the appearance of lice in the hair. Všiven® Plus is a medical product against lice and nits. It contains 100% low-viscosity dimethicone and acts on lice by a physical mechanism. Both products are gentle to the skin, easy to apply, safe and effective.
