Diclofenac Dr. Müller Pharma 100 mg Suppositories

Registered medicinal product

Diclofenac Dr. Müller Pharma 100 mg suppositories contains diclofenac sodium as the active ingredient, which:

- reduces symptoms of acute and chronic inflammation,
- dampens the pain, swelling,
- reduces fever.

Without doctor's recommendation, this medicinal product can be used for the treatment of:

- post-traumatic and post-operative pain,
- headache, backache and toothache,
- menstrual pain.

Based on doctor's recommendation, this medicinal product can be used for treatment of:

- pain and swellings caused by rheumatic disorders affecting the joints, as rheumatoid arthritis, osteoarthritis, ankylosing spondylitis (Bechterew's disease),
- various forms of non-articular rheumatism (e.g. inflammation of tendons, tendon vesicle or joint capsule, frozen shoulder, tennis elbow),
- acute attack of gout,
- migraine attacks,
- acute renal colic.

This medicinal product is indicated in adults and adolescents from 18 years of age and for rectal use only.

Legal status and reimbursement by health insurance is dependent on National Health Agency.

Please read SmPC/Patient leaflet carefully before you start to prescribe/use this medicinal product.

10 or 12 suppositories

Clean Hands (Čisté ruce®) Gel

Hand cleansing gel with disinfecting effect of alcohol

Contains 70% of ethylalcohol, which shows a high disinfectant activity. Glycerin and Aloe Vera moisturize and soften the skin.

Use: Apply 1 - 3 ml (depending on the size of the hands) of the gel in the palms and spread well

over the entire surface of the hands until the product dries. Do not rinse. It does not leave a sticky feeling on the hands after use.

Notice: Avoid contact with eyes. Keep out of reach of children and do not use for children under three years of age. Do not apply to damaged or

injured skin. Do not use in case of hypersensitivity to any component of the product.

Store at a temperature from +5 °C to 25 °C.

Keep away from open flames.

Do not smoke during application.

CAUTION FLAMMABLE!

50 ml, 100 ml, 200 ml

300 ml, 400 ml, 500 ml

Clean Hands (Čisté ruce®) Cream

Hydrates, lubricates and softens the skin of the hands after repeated use of alcohol-based disinfectants. Contains an antimicrobial ingredient.

Use: Apply an adequate amount of cream to the palms of your hands about 1-2 minutes after applying the disinfectant gel or solution, spread it all over your hands and let it absorb. Avoid contact with eyes.

Store at a temperature from +5 °C to 25 °C.

50 ml

Clean Hands (Čisté ruce®) Liquid Soap

Liquid soap with antimicrobial ingredient benzalkonium chlorid

Thanks to its antimicrobial properties helps to keep the hands clean and soft. Cleansing effect is provided by the gentle, skin friendly detergents.

The soap is suitable for frequent hand wash and longterm use.

Use: Wet your hands with water and apply sufficient amount of the soap. Work the soap until foam is formed on the entire surface of the hands

and let act for at least 30 seconds. Then rinse thoroughly.

Store at a temperature from +5 °C to 25 °C.

Avoid contact with eyes.

500 ml

Anginal®

Anginal® tablets and mouth sprays contain extracts of popular herbs. Anginal® tablets are sugar-free and all contain vitamin C.

Anginal® Tablets with Chamomile, Mallow and Sage

Food supplement with sweetener Sage

- contributes to the physiological function of immune system and supports the body defence system
- supports normal function of respiratory track and helps to maintain physiological breathing

Common mallow

- supports the physiological function of airways and pharynx

Chamomile

- supports normal function of respiratory track

and helps to maintain physiological breathing

- helps to relax the airways
- contributes to the physiological function of immune system and supports the body defence system

Vitamin C • contributes to normal function of immune system • to reduction of tiredness and fatigue

Composition: Bulking agent (sorbitol), L-ascorbic acid (vitamin C), anti-caking agent (magnesium stearate), firming agent (hydroxypropyl methylcellulose), chamomile blossom extract (Chamomilla recutita, maltodextrin), high mallow blossom extract (Malva sylvestris, maltodextrin), sage leaf extract (Salvia officinalis, maltodextrin), menthol, Eucalyptus oil, anti-caking agent (colloidal silicon dioxide)

Composition	in 100 g		in 1 tablet		% RI*

Calcium Pantothenicum

A traditional ointment for care of dry and chapped skin.

Calcium pantothenicum

Calcium pantothenicum is a traditional ointment which is suitable for dry and chapped skin.

It is suitable also for soothing irritated and reddish skin of children as well as greasing the nipples of nursing mothers.

30 g
100 g

Herbal ointments

Marigold, comfrey, chamomile, arnica and Sea buckthorn are important curative herbs used in the traditional folk medicine for centuries. The marigold blossom (*Calendula officinalis*) is used for the preparation of potions, infusions and extracts. As for comfrey (*Symphytum officinale*) it is its root that is mainly utilized, but also its leaves can be picked and used. One of the effective elements of comfrey is allantoin that is used in curative and cosmetic preparations. As for chamomile (*Chamomila recutita*) it is its dried floral garb without any addition of stems and leaves that is utilized. As for arnica (*Arnica montana*) it is its blossom essential oils that are mainly used. As for Sea buckthorn seed (*Hippophae rhamnoides*) it is its cold-press seed oil that is utilized. As for plantain (*Plantago lanceolata*) it is leaf that is utilized mainly for its beneficial effects. From technical hemp (*Cannabis sativa*), hemp oil and cannabidiol are used in the ointment, which have soothing and regenerating effects on the skin and tired muscles.

Arnica Ointment

Arnica ointment Dr. Müller Pharma is a traditional product containing standardized oil extract of arnica blossom (*Arnica montana*) made carefully to guarantee high content of active substances. Arnica substances, especially essential oils, have beneficial effect in a number of problems related to muscle overload and strain.

The arnica ointment is suitable for massage and subsequent skin care after injuries, and in case of problems with the locomotor systems and extremities. It relieves the muscle stress and refreshes tired legs. Owing to the high content of glycerine and beeswax, the product lubricates the skin very well. Apply several times daily as needed.

50 ml

Chamomile Ointment

TRADITIONAL

Chamomile ointment Dr. Müller Pharma is a traditional product containing chamomile oil made by means of a careful distillation of the blossom of chamomile (*Matricaria recutita*). It has standardized content of active substances, alpha-bisabolol and chamazulene.

The substances contained in the chamomile oil affect quite beneficially the skin irritated in any way (e.g. by sun, frost, wind, or radiation). Owing to its greasy ointment base and high content of the chamomile extract the product lubricates the skin thoroughly and leaves greasy film on the skin. Apply several times a day as needed.

50 ml

Cannabis Ointment

Cannabis ointment Dr. Müller Pharma is an effective preparation with contact of cannabis sativa seed oil and active substance called cannabidiol (CBD). Thanks to its unique composition it soothes and regenerates the skin. The ointment is recommended for use on dry, sensitive and generally problematic skin. Proven

ointment base helps to soften and grease the skin and glycerole contributes to the maintenance of natural hydration. When used for massage, it helps to regenerate tired muscles. Can be applied as often as needed and is suitable for longterm use.

50 ml

Comfrey Ointment

Traditional product contains standardized spirituous extract of comfrey (*Symphytum officinale*) made by careful method which guarantees a high content and complete spectrum of effective agents. The agents contained in comfrey have complete positive effects on the skin. Comfrey ointment Dr. Müller Pharma is convenient for massage of tired muscles and for general care for the skin. Massages by the product contribute beneficially to the body regeneration.

50 ml

Plantain Ointment

Plantain ointment containing ribwort plantain leaf extract is a traditional product suitable for skin care. The plantain contained substances calm beneficially the skin irritated by e.g. insect bite or sunbathing.

The ointment is also suitable for massages of tired legs and hands. Thanks to high glycerine and beeswax content, it greases the skin well. Apply several times daily as needed.

50 ml

Marigold Ointment

Traditional product contains standardized oil and spirituous extracts of marigold blossom (*Calendula officinalis*) produced by a careful method which guarantees a high content of active agents. Owing to this the ointment contains a complete spectrum of agents of marigold, which guarantees its high and comprehensive efficiency.

Marigold ointment Dr. Müller Pharma is convenient for massage, care for the skin influenced negatively by the environment (sun, wind, frost), or for dry skin of legs, hands and lips.

50 ml

Sea Buckthorn Ointment

Sea buckthorn ointment by Dr. Müller Pharma is a traditional product containing 100 per cent of Sea buckthorn virgin oil obtained by cold-press. Sea buckthorn contains a number of biologically active substances that affect beneficially the irritated skin (e.g. by sun, frost, wind, radiation).

In regard of the high content of glycerine and sea buckthorn oil, the ointment greases the skin very well. Apply several times a day as needed. To increase the effect, let the ointment act overnight.

50 ml

DermoChlorophyl[®]

The chlorophyll molecule belongs to porphyrins, a family of natural compounds which aid in the processes of the energetic and respiratory systems of all living organisms, including human beings.

DermoChlorophyl[®] Spray

This preparation is designed for a contactless application of chlorophyll on a dermatologically problematic skin.

- Protective barrier spray
- Brings relief and calms the skin
- Potent covering effect
- Can be applied even to sensitive skin

50 ml

DermoChlorophyl[®] Gel

The gel preparation is designed for the treatment of dermatologically problematic skin.

Use: Squeeze the gel from the tube and spread it on the skin to form 1-3 mm thick layer. The gel forms a greenish layer which gets dry quickly and has cooling effect. The gel may be applied repeatedly.

50 ml

DiabeCare®

The primary cause of diabetes is the disorder of glucose metabolism which, among other things, due to an aggravated supply of cells with glucose, can conduce to malfunctions of the skin. The skin is dry, itches often and its nutrition is worse. Legs are the most frequently affected parts of the body, however the symptoms are not only restricted to those areas.

DiabeCare® Hydration Cream

DiabeCare® Hydration cream by Dr. Müller Pharma is a preparation specially developed for dry and sensitive skin of diabetics. It absorbs easily, and after application does not leave any trace of oiliness or grease. The cream is a combination of carefully chosen active ingredients (macadamia oil, panthenol, vitamin E, urea, and Aloe Vera).

75 ml

DiabeCare® Softening Body Milk

DiabeCare® Softening body milk by Dr. Müller Pharma is specially designed for dry and sensitive skin of diabetics. It is also effective for cracked skin. The milk spreads easily, softening the skin. It contains a combination of carefully chosen active ingredients (macadamia nut oil, glycerine, urea, vitamin E, and bees wax).

150 ml

Oak Bark

Very high content of tannins in the oak bark forms a natural protection of the plant from parasites and animals who gnaw the bark as the taste of tannins is quite astringent. In folk medicine, tannins have been used for centuries for their astringent effect on the skin and mucosa (and/or small superficial blood vessels) in, for example, haemorrhoids, superficial abrasions, or mild burns.

Oak Bark Gel

Traditional product containing standard alcohol oak bark (*Quercus robur*) extract made by a careful procedure ensuring high content of active substances. Thanks to it the gel contains a wide spectrum of oak bark active substances, which guarantees its high and comprehensive efficiency.

75 ml

Oak Bark Ointment

Traditional product containing standard oak bark (*Quercus robur*) extract made by a careful procedure ensuring high content of active substances. Well-proven ointment base contributes to the skin softening and greasing at the application site. Apply several times a day as needed.

50 ml

Ferrofruit®

The product contains organically bound iron that is absorbable very well and has good taste properties.

Ferrofruit®

Liquid food supplement

Iron

- contributes to normal formation of red blood cells and haemoglobin
- contributes to normal function of the immune system
- contributes to reduction of fatigue and exhaustion

Ferrofruit® is suitable for iron supplementation:

- at increased fatigue and convalescence
- for blood donors
- for menstruating women
- for pregnant and breast-feeding women
- for growing children
- for adolescents
- for elderly people

Composition: Invert sugar, purified water, sour cherry juice (sour cherry juice concentrate, water), apple juice (apple juice concentrate, water), acidity regulator (sodium L-ascorbate, L-ascorbic acid), iron (II) gluconate (Fe²⁺), preservative (potassium sorbate).

Composition	in 100 g in 1 teaspoon		% RI*
	in 1 teaspoon		
Sour cherry juice	8 g	0,5 g	Not determined
Apple juice	5 g	0,3 g	Not determined
Iron (Fe ²⁺)	111 mg	7 mg	50 %

*RI – reference intake

1 teaspoon = 5 ml

The packing contains ~ 47 servings

Recommended doses: Children aged 3 and up: ½ teaspoon (2.5 ml) once daily. Children aged 4 and up: 1 teaspoon (5 ml) once daily. Children aged 12 and up and adults: 1 teaspoon 1-2 times daily. Use 30-60 minutes before or 2 hours after meals. Coffee and tea drinking can influence iron absorption adversely.

Do not exceed the recommended doses. The product does not substitute varied diet. Not suitable for persons suffering from hemochromatosis. Keep out of reach of children. Shake before use! Store at a dry place under the temperature of from +5 °C to +25 °C. After opening the syrup, keep it well closed at a cold and dark place.

300 g

Flatol®

Flatol® capsules contain simethicone and fennel oil.

Flatol® Capsules

Food supplement

Fennel

- helps with flatulence and belly spasm
- contributes to digestive functions and elimination

Composition: Simethicone, gelatine, fennel oil, humectant (glycerine), purified water, colours (iron oxide yellow, titanium dioxide)

Composition	in 100 g in 1 capsule		% RI*
	in 1 capsule		
Simethicone	51.6 g	80 mg	Not determined
Fennel oil	16.1 g	25 mg	Not determined

*RI – reference intake

Recommended doses: 1 capsule maximum 4 times daily, best during or after meals and/or before going to bed. The product is intended only for short-term use in case of an increased formation of flatulences.

Do not exceed the recommended doses. The product does not substitute varied food. Not intended for children, teenagers, pregnant and breast-feeding women. Keep out of reach of children.

Weight of the content: 7.4 g

50 capsules

Glycerine Suppositories

Glycerine in the suppository supports bowel evacuation and stool softening and moistening. It increases the stool volume in the lower part of the large intestine and makes defecation easier.

Glycerine Suppositories 2.2 g

Medical device

Composition: Glycerine, Sodium Stearate, Aqua

Dosage: Adults and children aged 12 and up: 1 suppository daily.

Way of use: Tear the foil above the pointed end of the suppository and remove the wrapper. Insert the suppository up into the rectum, pointed end first. The effect appears within maximum 30 minutes after the use.

Store at a dry place under the temperature of from +5 °C to +25 °C.

Do not use after the lapse of the shelf life marked on the pack.

Do not use if the pack is damaged. Keep out of the reach of children.

12 suppositories

Paediatric Glycerine Suppositories 1.0 g

Medical device

Composition: Glycerine, Sodium Stearate, Aqua

Dosage: Children aged 1 year and up: 1 suppository daily

Way of use: Tear the foil above the pointed end of the suppository and remove the wrapper. Insert the suppository up into the rectum, pointed end first. The effect appears within maximum 30 minutes after the use.

Store at a dry place under the temperature of from +5 °C to +25 °C.

Do not use after the lapse of the shelf life marked on the pack.

Do not use if the pack is damaged. Keep out of the reach of children.

12 suppositories

Hyalosan

Medical devices and cosmetic products of the Hyalosan range contain biologically active hyaluronic acid, some of them in combination with lactic acid. Hyaluronic acid is important natural component of many tissues of human body including the skin and mucous membranes. In the vaginal environment it forms a protective gel, which instantly protects and moisturizes mucous membrane, supports natural mechanisms of vaginal mucosa moisturization and accelerates natural process of its regeneration. It also prevents thinning of vaginal mucosa and supports its restoration in a period of natural or chemotherapy- or surgically-induced menopause. Lactic acid is under physiological conditions produced by bacteria, which colonize vaginal mucosa. It ensures acidic environment of vagina, which backwardly supports growing of natural bacterial microflora and also creates unfavourable conditions for the occurrence of undesirable microorganisms.

Hyalosan Vaginal Suppositories

Medical device

Hyalosan vaginal suppositories with hyaluronic acid maintain naturally moist environment of the vaginal mucosa. They are used to support regeneration and restoration of the natural state of the vaginal mucosa in the case of problems caused by vaginal dryness and vaginal atrophy.

Dosage: One suppository daily for first ten days or as recommended by your doctor.

For the treatment of vaginal dryness caused by menopause, apply one suppository for first 10-20 days, followed by a long-term treatment with one vaginal suppository 2 times per week. Hyalosan vaginal suppositories are intended for vaginal use only.

10 suppositories

Hyalosan Vaginal Gel

Medical device

Hyalosan vaginal gel with hyaluronic acid maintains naturally moist and slightly acidic environment of the vaginal mucosa thanks to the content of lactic acid. It is used to support regeneration and restoration of the natural state of the vaginal mucosa in the case of problems caused by:

- vaginal dryness associated with hormonal changes in all stages of a woman's life, especially during menopause, after labour, during breast-feeding, after chemotherapy and radiotherapy or gynaecological operations,

Hyalosan Lubricant Gel

Medical device

Hyalosan lubricant gel with hyaluronic acid is a medical device intended to maintain the natural moisture of the vaginal mucosa, to enrich intimate experiences and making them more pleasant. Hyaluronic acid supports the natural mechanisms of the vaginal mucosa moisturizing. The Hyalosan lubricant gel removes unpleasant painful feelings due to insufficient mucosal moisture and simultaneously supports regeneration and recovery of the natural state of the vaginal mucosa. It can be used together with a condom. The lubricating gel is also suitable for easier insertion of a thermometer or tampon into the vagina. It is water-based, it does not contain perfumes, oils or dyes. It does not leave any stains. It is not absorbed into the body. It does not substitute contraception.

50 ml

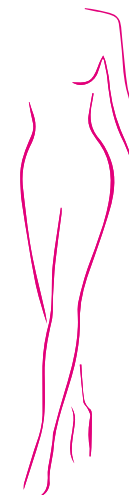

- vaginal atrophy manifested by itching, burning, redness or unpleasant feelings during intercourse.

It can be used as a lubricant gel in the case of insufficient moisture during intercourse. It is intended for vaginal use only.

Dosage: One tube daily for the first ten days, then every second to third day for at least 5 to 6 weeks. As a prevention of problems, Hyalosan vaginal gel with hyaluronic acid is also suitable for long-term use with dosage 1 to 2 tubes per week.

10 tubes, 7.5 ml each

Hyalosan Intimate Wash Gel

Fine wash gel with hyaluronic acid and gentle active detergents for everyday care of female intimate parts. Gel is suitable for the regular intimate hygiene and, thanks to the lactic acid content, maintains the natural pH of intimate areas. The wash gel does not dry out the skin, but on the contrary, thanks to content of hyaluronic acid soothes and leaves it perfectly clean, soft and naturally moisturized.

A necessary helper for the intimate comfort of every woman.

200 ml

IchthyoCare

White Ichthammol, the effective agent of the IchthyoCare preparations by Dr. Müller Pharma, is a light form of sulfonated slate oil. While ammonia is used for the neutralization of common dark ichthammol, and the final product contains a not negligible amount of ammonia, white ichthammol is neutralized by sodium ions which aren't so alien to our bodies and do not contain any free base that can irritate the skin. The advantage, then, is better solubility in water, a higher degree of purity, lighter colour and better dermatological tolerance. It is also more active against fungi and yeasts which are one of the causes of dandruff.

Hyalosan Intimate Wash Foam for Woman in Puerperium

Fine wash foam with hyaluronic acid, oak bark extract and gentle detergents for everyday care of female intimate parts during the postnatal period. This wash foam is suitable for everyday intimate hygiene and thanks to the lactic acid content, maintains the natural pH of intimate areas. Oak bark has an adstringent effect on the skin which enhances its natural regeneration.

This wash foam does not dry out the skin, but on the contrary, thanks to content of hyaluronic acid, soothes and leaves it perfectly clean, soft and naturally moisturized.

A necessary helper for the intimate comfort of every woman.

150 ml

IchthyoCare Anti-dandruff shampoo

Owing to its beneficial effect the shampoo with white ichthammol is recommended for care of the scalp in case of excess sebum production, itching and increased formation of dandruff. It is also effective as a supportive agent in psoriasis of the scalp.

Use: Apply an adequate amount of the shampoo on wet hair and massage the skin of the scalp until foam is formed. Let the shampoo act for some time. Then wash your hair and skin thoroughly. To reach the optimum effect, the Ichthammol shampoo should be applied 2-3 times a week for the period of about 4 to 6 weeks. Regular use of the Ichthammol shampoo once in a week is then recommended.

100 ml
200 ml

IchthyoCare Paste

This paste with white ichthammol (5 %) is suitable as a means of aftercare for problematic skin. The product due to the presence of zinc oxide has a very good anti-itch effect. It is very well tolerated.

The product does not require preservation.

30 ml

IchthyoCare Wash Foam

Wash foam with white ichthammol (3 %) is a preparation for aftercare and cleaning of the skin with dermatological problems (e.g. in acne or psoriasis). It is suitable for dry skin washing and is very well tolerated in long-term use on the whole body.

For optimal effect apply 2-3 times daily for approximately 4-6 weeks.

100 ml

IchthyoCare Ointment

This ointment which contains white ichthammol (4 %) is recommended as a preparation for the aftercare of skin problems, skin itching and rash after exposure to the sun. It is recommended for those people whose skin may need extra moistening and lubrication. It is tolerated very well.

The product does not require preservation.

30 ml

IchthyoCare Soap

The soap with 2.5% white ichthammol is a product for cleansing of the skin associated with itchy skin bearings at various dermatological disorders.

90 g

Klimakterin®

Horse balsams

Horse balsams are composed of a balanced combination of standardized herbal extracts and essential oils that increase blood circulation. The balsams are convenient for massage of tired and painful muscles, joints and tendons. They can also be used regularly for rheumatic problems.

250 ml

Horse Balsam Warming

The warming horse balsam is composed of balanced combination of standardized herbal extracts (horse chestnut, yellow sweet clover, marigold, witch hazel, mountain arnica, and chamomile), essential oils (fir leaf oil, pine oil, eucalyptus oil, mint oil, lavender oil, and thyme oil) and other substances that heat the tissues. It is convenient for massage of tired muscles and legs.

250 ml

Horse Balsam Cooling

The cooling horse balsam is composed of balanced combination of standardized herbal extracts (horse chestnut, yellow sweet clover, marigold, witch hazel, mountain arnica, and chamomile), essential oils (fir leaf oil, pine oil, eucalyptus oil, mint oil, lavender oil, and thyme oil) and other substances that cool the tissues. It is convenient for massage of tired muscles and legs.

Lubricant Gels Ty&Já®

A lubricant gel is something between a fluid and semisolid gel with a high content of water, which is to be applied on the genitals before sexual intercourse. Modern lubricant gels contain hydroxyethylcellulose – a modified natural cellulose – which has no side effects and does not damage condoms. The use of the gel increases the sliding effect and reduces the origin of micro traumas (tiny abrasions) that usually occur during sexual intercourse. The moistening of the genitals during sexual excitement is one of the conditions for successful intercourse, and it also helps women reach orgasm. A suitable gel can make your intimate moments very pleasant. Remember, if pain or persistent discomfort occurs during intercourse, see a doctor who is best able to treat any condition or disease which might be present.

Lubricant Gel Ty&Já® Silicone

Lubricant gel Ty&Já® silicone is a product with excellent lubricating properties for a more pleasant and richer intimate enjoyment during sexual intercourse, for long-term and intensive enjoyment. It does not contain water, does not absorb and does not evaporate quickly. The gel thus helps to remove for a longer time the unpleasantness which can result from insufficient vaginal moistening. It is also suitable as a massage gel.

50 ml

Lubricant Gel Ty&Já® Non-perfumed

Medical device

Lubricant gel Ty&Já® non-perfumed is a product for preserving natural vaginal moistening and for a more pleasant and richer intimate enjoyment during sexual intercourse. The gel removes the unpleasantness and pain which can result from insufficient vaginal moistening. The gel can be applied together with a condom. It is also suitable for easier insertion of a thermometer or sanitary napkins into the vagina and for easier measuring of the rectal temperature. It is water based and does not contain perfumes, oils, and colours; furthermore, it does not stain. The gel does not absorb into the body. It is not a substitute for contraception however!

50 ml
100 ml

Lubricant Gel Ty&Já® with Tea Tree Oil

Lubricant gel Ty&Já® with Tea Tree oil is a product for a more pleasant and richer intimate enjoyment during sexual intercourse. The gel removes the unpleasantness which can result from insufficient vaginal moistening. It is water based and does not contain colours; furthermore, it does not stain.

50 ml
100 ml

Lubricant Gel Ty&Já® Perfumed with Strawberry Aroma

Medical device

Lubricant gel Ty&Já® perfumed with strawberry aroma is a product for preserving natural vaginal moistening and for a more pleasant and richer intimate enjoyment during sexual intercourse. The gel removes the unpleasantness and pain which can result from insufficient vaginal moistening. The gel can be applied together with a condom. It is also suitable for easier insertion of a thermometer or sanitary napkins into the vagina and for easier measuring of the rectal temperature. It is water based and does not contain oils and colours; furthermore, it does not stain. The gel does not absorb into the body. It is not a substitute for contraception however!

100 ml

Lubricant Gel Ty&Já® Perfumed with Peach Aroma

Medical device

Lubricant gel Ty&Já® perfumed with peach aroma is a product for preserving natural vaginal moistening and for a more pleasant and richer intimate enjoyment during sexual intercourse. The gel removes the unpleasantness and pain which can result from insufficient vaginal moistening. The gel can be applied together with a condom. It is also suitable for easier insertion of a thermometer or sanitary napkins into the vagina and for easier measuring of the rectal temperature. It is water based and does not contain oils and colours; furthermore, it does not stain. The gel does not absorb into the body. It is not a substitute for contraception however!

Protective hand creams

Primalona® Glycerin Hand Cream with Aloe Vera

Regenerative cream with Aloe Vera and glycerin which hydrates the dry skin after work with detergents. A protective for work in all industries and services.

100 ml

Primalona® Disinfective Hand Cream with Chamomile

Calming cream with chamomile extract is convenient for regular treatment of the dry skin after work with detergents. A protective for work in all industries and services.

100 ml

Primalona® Regenerative Hand Cream with Marigold

Regenerative hand cream with marigold extract is convenient for regular treatment of the dry skin after frequent use of soap. A protective for work in all industries and services.

100 ml

The skin has protective mechanisms but over the long term (e.g. due to frequent washing), its protective function weakens. The symptoms of damaged skin are red and inflamed skin, excess drying, painful tiny cracks or itching of the skin. Therefore, careful washing with the right washing products is of the absolute necessity. Of equal importance, though, is the use of special creams on the skin after washing. Primalona® product line is a hand protection at work in all branches of industry and services.

Tea Tree Oil

The essential oil from wild growing trees of small size, growing on the East Australian coast (Melaleuca alternifolia) has been used by Australian aborigines as a cure for a number of diseases for thousands of years. Today the source of Tea Tree Oil (TTO) are plants growing in plantations. Its outstanding anti-bacterial, anti-fungal and anti-inflammatory effects are used in modern medicine and cosmetics. TTO is not only effective for a wide spectrum of bacteria and other pathogenic organisms, it also supports the increase of the immune system. The quality of the oil is very important – not all oils have a high content of effective ingredients (especially 4-terpineol). For all of their products, Dr. Müller Pharma always uses the best quality pharmaceutical Tea Tree Oil.

Tea Tree Oil 100% Pure Oil

Tea Tree oil Dr. Müller Pharma is a standardized, ultra pure, high quality oil produced exclusively from the tree *Melaleuca alternifolia* by special careful distillation which ensures high efficiency and fine characteristic aroma of the oil.

Properties:

- Very efficient natural antiseptics
- Wide spectrum of antimicrobial activity
- Intensive repellent effects
- Minimal dermal irritability

Beneficial effect:

- On manifestations of acne
- On mouth ulcers, warts, herpes
- On itching due to insect bite
- Repels ticks

10 ml
30 ml

Tea Tree Oil Roll-On

Tea Tree oil Dr. Müller Pharma is a standardized, ultra pure, high quality oil produced exclusively from the tree *Melaleuca alternifolia* by special careful distillation which ensures high efficiency and fine characteristic aroma of the oil. Concentrated Australian Tea Tree Oil fraction with an increased portion of active substances and reduced content of irritants.

Properties:

- Very efficient natural antiseptics
- Wide spectrum of antimicrobial activity
- Intensive repellent effects
- Minimal dermal irritability

Beneficial effect:

- On manifestations of acne
- On mouth ulcers, warts, herpes
- On itching due to insect bite
- Repels ticks

TTO Roll-On is a convenient application form and fits every pocket.

4 ml

Tea Tree Oil Cream

The cream with Tea Tree Oil is designed for regular care of skin and complexion prone to acne or similar dermatological problems. The cream contains active substances (macadamia oil, jojoba oil, avocado oil and vitamin E) that nourish the skin and keep it soft. Tea Tree Oil acts effectively in symptoms of acne.

30 ml

Tea Tree Oil Foot Massage Cream

A very efficient massage foot cream with antiseptic Australian Tea Tree Oil is excellent for removal of the feeling of tired or swollen feet. Massages by the product improve also the blood flow in the feet.

It has deodorant effect, prevents foot sweating and helps efficiently to fight foot odour. It softens coarse skin on the sole of the foot.

150 ml

Tea Tree Oil Skin Lotion

Tea Tree Oil Skin Lotion cleans, pleasantly refreshes and soothes the skin while effectively removing dirt without undesirable drying. It is excellent for people with sensitive skin who are prone to dermatological problems. It contains antiseptic Australian Tea Tree Oil and extract of witch hazel (Hamamelis) that have beneficial effect on the skin pores. For best results apply this skin lotion together with Dr. Müller Pharma Tea Tree Oil facial cleansing gel.

150 ml

Tea Tree Oil Facial and Body Milk

Light milk containing Tea Tree Oil is designed for daily skin treatment after bathing, showering, shaving etc. It eases irritation or itching of the skin. The milk calms the skin after sunburns, beneficially affects problematic skin prone to acne, as well as soothes chapped and rough skin.

150 ml

Tea Tree Oil Lip Balm

Lip balm brings immediate relief to chapped and dry lips. It provides long-term protection from the weather (cold, wind, sunshine) and UV radiation, being especially useful in the summer at the seaside or in the mountains in winter. The effects are made stronger owing to other active substances – vitamin E and glycerine.

10 ml

Natural Glycerine Soap with Tea Tree Oil

The pure natural unscented soap contains 1% of Tea Tree oil and 0.5% of Tea Tree leaves. The Tea Tree oil imparts a long-term deodorant effect to the soft soap and the leaves act as a natural peeling. The soap has a beneficial effect especially in people with problematic skin disposed to acne and other dermatological problems. The soap is recommended for daily whole body washing. It can be used by all family members.

90 g

Tea Tree Oil Facial Cleansing Gel

Light cleansing gel with Australian Tea Tree Oil for daily care of oily skin or the skin of young

people prone to acne and other dermatological problems. The blend of light cleansing herbal ingredients removes the dirt, excessive oil and make-up without over drying of skin. Tea Tree Oil

loosens clogged pores that can cause acne and calms acne symptoms. It can be used instead of soap. For best results apply this gel together with Dr. Müller Pharma Tea Tree Oil skin lotion.

150 ml

Tea Tree Oil Anti-dandruff shampoo

Shampoo with Australian Tea Tree Oil is designed for gentle and effective reduction of dandruff. It

effectively cleans the hair and scalp of dirt and dandruff and keeps the hair finer, brighter, and softer. Best results will be achieved by regular use.

200 ml

Tea Tree Oil Condoms

Medical device
When properly used, condoms are effective in preventing pregnancy and reduce the risk of

infection and spread of STDs including AIDS. Antiseptic Australian Tea Tree Oil alleviates discomfort at bacterial, yeast and fungal infections and reduces their undesirable symptoms.

3 pieces

Tea Tree Oil Intimate Wash Foam

Fine wash foam with Tea Tree Oil is suitable for daily hygiene of intimate parts of the body. It

does not irritate or dry the skin. Its regular use can influence beneficially the problems related to itching and burning of the intimate parts.

100 ml

Tea Tree Oil Intimate Wash Gel

Fine Tea Tree Oil wash gel is suitable for daily hygiene of intimate parts. Regular use can

prevent complaints of intimate parts and reduce their unpleasant symptoms. Lactic acid helps to maintain natural pH of intimate parts.

200 ml

Tea Tree Oil Gel for Women's Intimate Hygiene

Tea Tree Oil Gel for Women's Intimate Hygiene Dr. Müller Pharma is designed for hygiene of woman's external genitals if suffering from itching, burning or dryness of intimate parts. These

can occur most often in relation with therapy by antibiotics, change of water quality, use of soaps and shower gels, or in case of change of a sexual partner.

The product contains 4-terpineol, the distilled active substance of Tea Tree Oil (Melaleuca

Alternifolia Leaf Oil). Irritating and potentially allergenic compounds are removed by distillation. The gel can also be used as a lubricant and it is recommended before and after visiting public swimming pools.

7 tubes, 7.5 ml each

PantheHair®

The rank of the products for hair care has been developed based partly on the most modern active ingredients intended for protection, nourishment and a better look of hair, and partly on fine tensides used in hair cosmetics.

The most effective agent in all these products is panthenol which is contained in a biologically active concentration – shampoos contain 3 % and conditioners contain 4 % of panthenol. The provitamin B5 is necessary for beautiful hair.

PantheHair® Shampoo for Normal Hair

PantheHair® Shampoo for normal hair contains 3 % of panthenol that is beneficial for the hair. The use of the shampoo will result in beautiful and fine hair.

- Everyday care for the hair
- Care for the hair in case of worsened quality of the hair

Use:

Apply the shampoo on wet hair and massage the skin of the scalp until foam is formed. Let the shampoo act for some time. Then wash your hair thoroughly.

200 ml

PantheHair® Shampoo for Greasy Hair

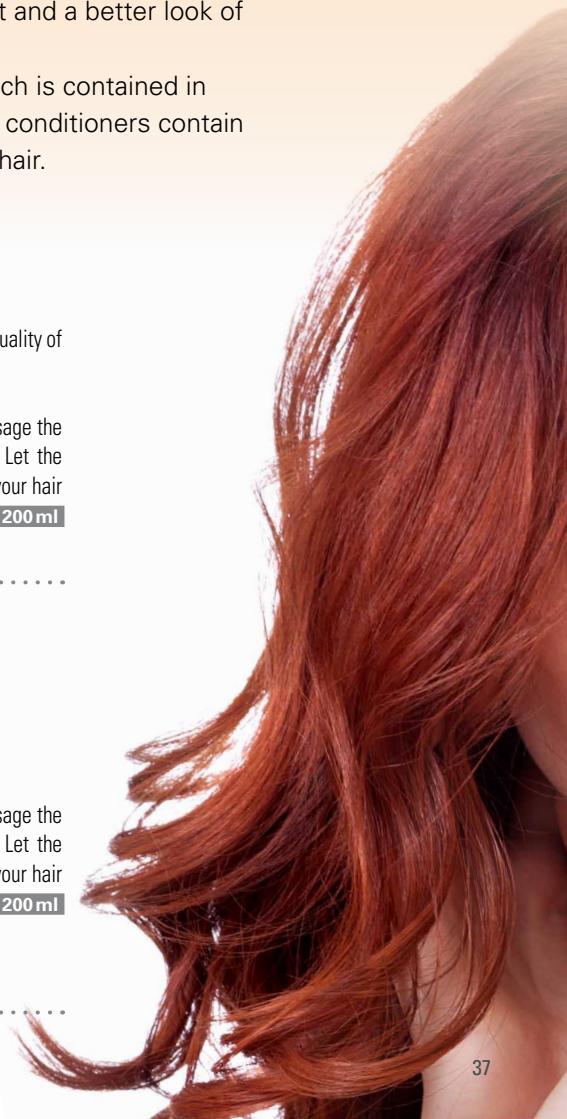

PantheHair® Shampoo for greasy hair contains 3 % of panthenol that is beneficial for the hair. The use of the shampoo will result in beautiful and fine hair.

- Increased production of hair oil
- Itching scalp

Use:

Apply the shampoo on wet hair and massage the skin of the scalp until foam is formed. Let the shampoo act for some time. Then wash your hair thoroughly.

200 ml

PanthHair® Shampoo for Damaged Hair

PanthHair® Shampoo for damaged hair contains 3 % of panthenol which is beneficial for the hair. The use of the shampoo will make your hair beautiful and fine.

- Frequent use of curling irons and blow-drying
- Split ends
- Permed and coloured hair

Use:

Apply the shampoo on wet hair and massage the skin of the scalp until foam is formed. Let the shampoo act for some time. Then wash your hair thoroughly.

200 ml

PanthHair® Conditioner

PanthHair® Conditioner for easy combing of hair contains 4 % of panthenol and substances with anti-static activity, that give your hair more volume. Regular use of the conditioner results in fine, shiny and easy-to-style hair.

Use:

Apply sufficient amount of the conditioner on wet hair after washing them with the shampoo. Let act for some time, then rinse your hair thoroughly.

200 ml

PanthHair® Caffeine Shampoo

PanthHair® Caffeine shampoo stimulates hair growth and contains gentle active detergents that are suitable for everyday care of your hair and scalp. The use will result in vital and beautiful hair.

- promotes hair growth
- suitable care for itchy scalp
- gentle cooling effect

Use:

Massage the shampoo gently into wet hair until foam is formed. Let act for at least 2 minutes to allow caffeine to get directly to the hair roots. Then rinse your hair thoroughly.

200 ml

PanthHair® Anti-dandruff shampoo

PanthHair® Anti-dandruff shampoo contains 3 % of panthenol together with two active substances - climbazole and octopirox (piroctone olamine) that have different mechanisms of action to fight against.

- care in case of increased dandruff formation
- hair care in case of excessive oil production
- care for itchy and flaky scalp

Use:

Apply the shampoo on wet hair and scalp and massage in gently until foam is formed. Let act for some time, then rinse your hair thoroughly.

200 ml

Panthenol

Panthenol or pantothenic acid are necessary for the preservation of the healthy complexion, beautiful hair and nails. The lack of panthenol has highly negative effects on the skin: the reduction of its elasticity, faster ageing process and progression of wrinkles; on the hair – the deterioration of its quality, loss of its shine and higher fragility. For the said reasons, panthenol is utilized in dermatology and in cosmetic applications. Panthenol concentration is also of high importance in dermatological and therapeutical products. It has been clearly proved that the products containing over 1 % of panthenol have positive effects.

Panthenol Foam 6 %

- The foam product relieves, calms and pleasantly cools the skin after excessive exposure to sun or similar types of irritation.
- This easy penetrating foam enables application to sensitive areas where continual application can be painful.
- Dexpantenol is invital to maintain healthy skin.

150 ml

Panthenol Cream 7 %

- The cream is suitable for everyday care for skin which has been exposed to stress or weather (sun, wind, or frost).
- The skin will be smooth after the cream use.

30 ml

Panthenol Gel 7 %

- Relieves discomfort, calms and pleasantly cools the skin after excessive exposure to the sun
- It can be easily applied
- Thanks to its unique composition it is absorbed into the skin in a few minutes without the necessity of further application

100 ml

Panthenol Body Milk 7 %

- Refreshing and light emulsion with intensive effect of D-panthenol.
- For treatment of skin irritated or stressed by sunbathing, bathing, sauna, frost, or dryness.
- Suitable even for especially sensitive skin.

200 ml

Panthenol Lip Cream 7 %

The lip cream with panthenol brings immediate relief to dry and stressed lips. It greases the lips and makes them soft. Its use is recommended during the whole year, especially in excessive sun radiation or frost.

10 ml

Panthenol Lipstick

Lipstick with panthenol bringing quick relief to dry lips.

- Essential oils

Use: Squeeze out about 1 cm of the ointment several times daily as needed and apply to the skin around the nose irritated by the common cold or frequent blowing the nose. Suitable for adults and children aged 3 and up.

7.5 ml

Dexpanthenol calms the nasal mucosa during rhinitis and supports its moistening.

Use: Apply in each nostril several times a day as needed. Suitable for adults and children aged three and up for prevention of symptoms and as an additional therapy of allergic rhinitis. The spray can also be used by pregnant and breastfeeding women.

PantheNose® Nasal Ointment with Bisabolol

For use around the nose in case of rhinitis

Contains the following active substances:

- Panthenol
- Vitamin E
- Bisabolol

Use: Squeeze out about 1 cm of the ointment several times daily as needed and apply to the skin around the nose irritated by the common cold or frequent blowing the nose. Suitable for adults and children aged 3 and up.

7.5 ml

PediCare®

The feet are daily much exerted and often suffer from various health complications. Many people have problems with hard skin of the heels, frequent callosity, increased foot perspiration and bad foot odour. Most problems appear from spring till autumn, when the temperature is higher, so the feet sweat, which supports a higher reproduction of bacteria, yeasts and various fungi. Then a small injury will start a number of problems. These products should become a common equipment of bathrooms and should be used in everyday care of the feet.

PediCare® Balm for Hard Skin

The balm is intended for softening and moistening the hard skin of the feet, hands, knees and elbows. It quickly absorbs, moistens and softens the skin efficiently. It protects the skin from desiccation followed by hardening and peeling.

Use: PediCare® Balm for hard skin should be applied on well-washed and dry spots several times a day and gently rubbed in.

100 ml

PediCare® Cream for Fissured Heels

This regeneration cream is intended for fissured heels and skin of the soles. It greases well the skin and softens the layers of fissured skin. If used regularly, it returns the natural elasticity and resistance to the skin. It protects from drying the heel skin and prevents fissures and related unpleasant manifestations.

Use: PediCare® Cream for fissured heels should be applied daily on well-washed and dry feet, best before going to sleep, and gently rubbed in.

100 ml

Chest Rub Balsam

Chest Rub Balsam is suitable for massage of the chest, throat, forehead, temples and nape. The balsam contains essential oils – volatile, water insoluble products of plants and mixtures of substances with a very strong odour.

Chest Rub Balsam

Included essential oils (pine, peppermint, eucalyptus and fir) in combination with menthol and

camphor have a positive effect on respiratory symptoms during a cold and stuffy nose.

50 ml

Tusolven®

Pelargonium (*Pelargonium sidoides*) is a perennial herb from South Africa where it is used in traditional medicine. Its root is known for its strong beneficial effect on the respiratory system. Its effect is potentiated by vitamin C content.

Tusolven® Syrup

Liquid food supplement

Contains 20 mg/5 ml extract of South African geranium (*Pelargonium sidoides*)

South African geranium (*Pelargonium sidoides*)

- it is a perennial herb from South Africa where it is used in traditional medicine

SulfaDerm®

Sulfur-containing soap, shampoo and tonic are traditional products suitable for excessively greasy skin. They help to remove the skin grease and clean the skin pores. They are very gentle; they do not impair the skin moisture and balance. The products can be used frequently.

SulfaDerm® Sulfur Soap

- Soap effectively removes skin impurities, cleans the skin in depths and leaves the skin naturally soft.
- Contained sulfur reduces sebum production, releases and cleans skin pores and reduces the formation of comedones.

Use: Gently wash skin with soap and then rinse. To enhance the effect, you can leave a few minutes and then rinse only. Protect the eyes and mucous membranes! In case of skin irritation, discontinue application.

90 g

SulfaDerm® Sulfur Tonic

Unique product containing natural active substance – elemental sulfur. It is suitable for every day care for sensitive, excessively oily skin prone to acne. It releases skin pores and leaves the skin clean and soft.

Tonic can be applied onto the skin of whole body, including face and scalp, where it prevents itching and dandruff formation.

Use as often as needed. There is no rinsing required after use.

Shake well before use.

150 ml

SulfaDerm® Sulfur Shampoo

Traditional sulfur-containing product is suitable for care for excessively greasy hair. It also influences beneficially itching scalp and dandruff formation.

- Sulfur contained in the shampoo reduces excessive sebum and greasy dandruff formation.
- SulfaDerm® Shampoo contains gentle washing ingredients. Its pH value is beneficial for skin and hair.
- It can be used frequently.

Use: Apply the shampoo twice onto damp hair. Let the second application act for several minutes and then wash your hair thoroughly.

100 ml

Urosept®

Urosept® FORTE with concentrated cranberry juice (*Vaccinium macrocarpon*) WITHOUT SUGAR

Food supplement with sweetener in liquid form

Large-fruited cranberry • Popularly called Canadian cranberry (*Vaccinium macrocarpon*), with high content of kidney health supporting proanthocyanidins. **Bearberry** • Supports normal bladder and kidney function. • Contributes to natural defenses and resilience. **Rosehip** • Supports normal bladder and kidney function. • Contributes to natural defenses and resilience.

Urosept® Pastilles SUGAR FREE

Food supplement with sweetener

Varikosan®

Blood vessel and blood circulation disorders are the most frequent diseases in the developed countries. Varikosan® series has been developed on the basis of both the modern and traditional knowledge of the vessel wall construction. It contains a balanced combination of natural substances for care for legs.

Varikosan® Massage Gel

Herbal product relieves the feeling of painful legs

- Suitable for massages of heavy and painful legs
- Refreshes tired legs • Suitable after difficult work and sports

Use: Apply Varikosan® Massage gel in the morning and in the evening and/or several times daily if needed. You can use it both for packs and massages. For massages apply sufficient amount on the legs and massage gently for at least 10 minutes in the direction from the feet to the heart. If the gel is absorbed, apply it repeatedly.

100 ml

Varikosan® Spray

- Herbal product to refresh tired, heavy and stressed legs • Suitable after difficult work and sports

Use: Varikosan® Spray is a product for easy contactless application on tired and swollen legs. Spray the product on the legs several times a day. If the spray is absorbed, you can repeat the application.

75 ml

Vitamin D3

Vitamin D3 (cholecalciferol) belongs to the group of fat-soluble vitamins and is one of the most important forms in the group of vitamins D. Vitamin D3 is produced by the skin when it's exposed to direct sunlight. During the months with little sunshine, its intake can be increased with food supplements. A small amount of vitamin D3 is in fish oil, liver or egg yolk. The Ministry of Health of the Czech Republic (in 2020) recommends daily doses of 1,000–2,000 IU of vitamin D3 for adults, pregnant women or the elderly who need a higher supply of vitamin D.

Vitamin D3 Mouth Spray

Liquid food supplement

One dose (pump) delivers 500 IU of Vitamin D3.

- Contributes to the normal function of the immune system
- Contributes to the normal absorption of calcium and phosphorus
- Contributes to the maintenance of normal bones & teeth
- Is needed for the normal growth and development of bone in children.

Composition: Medium saturated triacylglycerols (Triglycerida saturata media), Vitamin D3 (cholecalciferol).

Composition	in 100 ml	in 1 dose	% RI*
		in 2 doses	in 1 dose in 2 doses
Vitamin D3 (cholecalciferol)	10.33 mg	12.5 µg (500 IU) 25 µg (1000 IU)	250 % 500 %

*RI – reference intake

Connect the applicator to the bottle before the first use. Apply into the mouth. Children from 3 years of age: 1 pump once daily Children from 12 years of age and adults: 2 pumps daily Pregnant and breastfeeding women: 1 pump once daily.

30 ml • 240 doses

Vitamin E

Vitamin E, alpha-tocopherol, is a liposoluble vitamin and occurs by nature in vegetable oils and cereal sprouts. In dermatology, following application it supports hydration, suppleness and creaminess of the skin. All its effects relate to an antioxidative activity – the ability to neutralize free radicals originating as a consequence of various radiations and chemical or other undesirable influences of the environment. When applied on the skin, vitamin E protects skin cells from damage, slows down the ageing, and supports elasticity, creaminess of the skin and youngness of the complexion.

Vitamin E Cream

The cream with increased content of vitamin E and panthenol is designed for regular everyday care for the skin. Owing to the content of active substances it cares for the dry skin stressed by sun radiation.

30 ml

Vitamin E Body Milk

Body milk with an increased content of vitamin E and panthenol cares finely for the whole body skin after bath. It moistens the skin perfectly and keeps it soft and smooth.

150 ml

Vitamin E Ointment

Ointment with high content of vitamin E (5 %) and panthenol (2 %) is designed especially for greasing of dry or chapped skin. Owing to the content of active substances it keeps the skin fine and soft.

30 g

VšiVen®

Louse is a parasitic insect living in human hair where it sucks blood. It spreads by means of various objects (combs, hair brushes, headgears and bed linen). The general precondition in the prevention of pediculosis is personal hygiene, especially repeated washing of the head, and in case of infestation, immediate treatment with a proper preparation. If the infestation occurs in a group of people, it is necessary to treat all of the people there. The louse is more and more resistant to many preparations. VšiVen® contains essential plant oils and fruit extracts that can reduce the occurrence of lice in hair. VšiVen® Plus makes a physical mechanism primarily to nits. Both products are skin friendly, easy to apply and safe.

VšiVen® Hair Balsam and Shampoo

Hair balsam

- Contains efficient natural essential oils and fruit extracts that diminish louse occurrence in the hair
- Easy application
- Safe and efficient

Shampoo

- Extends the effect of the hair balsam
- Diminishes excessive hair dryness and supports hair regeneration

Hair balsam 150 ml

Shampoo 150 ml

VšiVen® PLUS

Medical device

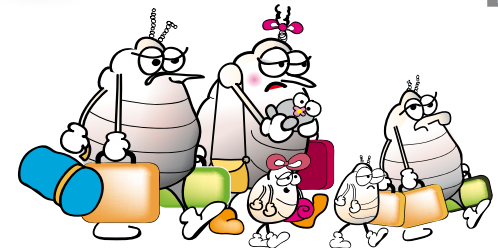

VšiVen® PLUS against lice and nits

- Medical device for topical application to hair and skin head for the removal of *Pediculus capitis* and prevention development of nits
- Preparation based on silicones (a mixture of oils - synthetic and natural, contains silicone oil, almond oil, oil from apricot kernels and vitamin E)
- A mixture of oils - synthetic and natural (contains silicone oil, almond oil, oil from apricot kernels and vitamin E)

• Mechanism of action is physical
This product can be used by adults, pregnant women and children from 6 months.

This preparation is for external use only!
