

THE WORLD OF HERBAL AND FRUIT INFUSIONS

The main focus of Megafyt Pharma s.r.o., is the production of registered herbal medicinal products, also mono-component teas and tea blends. These products have the status of food supplement or food and are being sold through pharmacy distribution networks. Megafyt Pharma s.r.o., being one of the few producers of herbal teas in the Czech Republic, has a large portion of its products registered as herbal medicinal products. To achieve this registration status, all manufacturing activities must comply with the requirements of excellent manufacturing practice. The same requirements are applied to products in the category of food and food supplements that Megafyt Pharma s.r.o. makes. Today, the assortment represents almost 100 products that are manufactured according to approved and proven recipes.

Natural ingredients for our teas are carefully selected. The whole process of making teas, from the input of raw materials, to their sales in pharmacies, is continuously checked by employees of internal and external laboratories, and supervised by the responsible state authorities for compliance with the standard of pharmaceutical production and distribution within the Czech and Slovak Republic.
